**Nuking the Moon** Vince Houghton, 2020-05-05 The International Spy Museum s Historian takes us on a wild tour of missions and schemes that almost happened but were ultimately deemed too dangerous expensive ahead of their time or even certifiably insane Compulsively readable laugh out loud history Mary Roach New York Times bestselling author of *Grunt* and *Stiff* In 1958 the U S Air Force nuked the moon as a show of military force In 1967 the CIA sent live cats to spy on the Soviet government In 1942 the British built a torpedo proof aircraft carrier out of an iceberg Of course none of these things ever actually happened But in *Nuking the Moon* intelligence historian Vince Houghton proves that abandoned plans can be just as illuminating and every bit as entertaining as the ones that made it Vividly capturing the fascinating stories of how twenty one plans from WWII and the Cold War went from conception planning and testing to cancellation Houghton explores what happens when innovation meets desperation For every plan as good as D Day there s a scheme to strap bombs to bats or dig a spy tunnel underneath the Soviet embassy Along the way he reveals what each one tells us about twentieth century history the art of spycraft military strategy and famous figures like JFK Castro and Churchill By turns terrifying and hilarious but always riveting this is the unique story of history left on the drawing board **The Complete Book of Spaceflight**

David Darling, 2008-04-21 A commanding encyclopedia of the history and principles of spaceflight from earliest conceptions to faster than light galaxy hopping Here is the first truly comprehensive guide to space exploration and propulsion from the first musings of the Greeks to current scientific speculation about interstellar travel using warp drives and wormholes Space buffs will delight in its in depth coverage of all key manned and unmanned missions and space vehicles past present and projected and its clear explanations of the technologies involved Over the course of more than 2 000 extensively cross referenced entries astronomer David Darling also provides fascinating insights into the cultural development of spaceflight In vivid accounts of the major characters and historical events involved he provides fascinating tales of early innovators the cross pollination that has long existed between science fiction and science fact and the sometimes obscure links between

geopolitics warfare and advances in rocketry      **Secret Empire** Philip Taubman,2003 During the most dangerous years of the Cold War a handful of Americans secretly built machines that revolutionized spying and warfare while protecting the United States from a surprise nuclear attack This is their story told in full for the first time of photos      Speed Bob Gilliland,Keith Dunnavant,2021-06 On December 22 1964 at a small closely guarded airstrip in the desert town of Palmdale California Lockheed test pilot Bob Gilliland stepped into a strange looking aircraft and roared into aviation history Developed at the super secret Skunk Works the SR 71 Blackbird was a technological marvel In fact more than a half century later the Mach 3 plus titanium wonder designed by Clarence L Kelly Johnson remains the world s fastest jet It took a test pilot with the right combination of intelligence skill and nerve to make the first flight of the SR 71 and the thirty eight year old Gilliland had spent much of his life pushing the edge In Speed one of America s greatest test pilots collaborates with acclaimed journalist Keith Dunnavant to tell his remarkable story How he was pushed to excel by his demanding father How a lucky envelope at the U S Naval Academy altered the trajectory of his life How he talked his way into U S Air Force fighters at the dawn of the jet age despite being told he was too tall How he made the conscious decision to trade the security of the business world for the dangerous life of an experimental test pilot including time at the clandestine base Area 51 working on the Central Intelligence Agency s Oxcart program The narrative focuses most intently on Gilliland s years as the chief test pilot of the SR 71 as he played a leading role in the development of the entire fleet of spy planes while surviving several emergencies that very nearly ended in disaster Waging the Cold War at 85 000 feet the SR 71 became an unrivaled intelligence gathering asset for the U S Air Force invulnerable to enemy defenses for a quarter century Gilliland s work with the SR 71 defined him especially after the Cold War when many of the secrets began to be revealed and the plane emerged from the shadows not just as a tangible museum artifact but as an icon that burrowed deep into the national consciousness Like the Blackbird itself Speed is a story animated by the power of ambition and risk taking during the heady days of the American Century      **With Courage: The U.S. Army Air Forces in World War II** ,      **With Courage** Bernard C. Nalty,John F. Shiner,George M. Watson,1994 In the last decade of the twentieth century today s United States Air Force marks the fiftieth anniversary of its part in a national effort that opposed a coalition of enemies in a global war American and allied air forces in the conflict for the first time achieved striking range and effectiveness making air power a force equal to that of traditional armies and navies The Center for Air Force History has prepared this narrative to commemorate the accomplishments of American air power in World War II and present to the American people a record of valor in the name of freedom Partial contents include A Weapon and an Idea Europe in Flames In Desperate Battle Building Air Power Defeating Italy and Germany Victory Over Japan A New Age Theater Maps Air Forces Lineages      **The Very Best Men** Evan Thomas,2012-12-04 The Very Best Men is the story of the CIA s early days as told through the careers of four glamorous daring and idealistic men who ran covert operations for the government from the end of World War II to Vietnam Evan

Thomas re creates the personal dramas and sometimes tragic lives of Frank Wisner Richard Bissell Tracy Barnes and Desmond FitzGerald who risked everything to contain the Soviet threat Within the inner circles of Washington they were regarded as the best and the brightest They planned and acted to keep the country out of war by stealth and political action and to do by cunning and sleight of hand what great armies could not must not be allowed to do In the end they were too idealistic and too honorable and were unsuited for the dark duplicitous life of spying Their hubris and na vet led them astray producing both sensational coups and spectacular blunders like the Bay of Pigs and the failed assassination attempts on foreign leaders in the early 1960s Thomas draws on the CIA s own secret histories to which he has had exclusive access as well as extensive interviews to bring to life a crucial piece of American history *The Grand Designers* , **On Time and On Budget: Project Management Collection (4 Books)** Harvard Business Review,Joe Knight,Roger Thomas,Brad Angus,Aaron J. Newberry,Eric Jumper,2004 On 17 December 1903 at Kitty Hawk NC the Wright brothers succeeded in achieving controlled flight in a heavier than air machine This feat was accomplished by them only after meticulous experiments and a study of the work of others before them like Sir George Cayley Otto Lilienthal and Samuel Langley The first evidence of the academic community becoming interested in human flight is found in 1883 when Professor J J Montgomery of Santa Clara College conducted a series of glider tests Seven years later in 1890 Octave Chanute presented a number of lectures to students of Sibley College Cornell University entitled Aerial Navigation This book is a collection of papers solicited from U S universities or institutions with a history of programs in Aerospace Aeronautical engineering There are 69 institutions covered in the 71 chapters This collection of papers represents an authoritative story of the development of educational programs in the nation that were devoted to human flight Most of these programs are still in existence but there are a few papers covering the history of programs that are no longer in operation documented in Part I as well as the rapid expansion of educational programs relating to aeronautical engineering that took place in the 1940s Part II is devoted to the four schools that were pioneers in establishing formal programs Part III describes the activities of the

Guggenheim Foundation that spurred much of the development of programs in aeronautical engineering Part IV covers the 48 colleges and universities that were formally established in the mid 1930s to the present The military institutions are grouped together in the Part V and Part VI presents the histories of those programs that evolved from proprietary institutions

**Eyeing the Red Storm** Robert M. Dienesch, 2016-04 In 1954 the U S Air Force launched an ambitious program known as WS 117L to develop the world's first reconnaissance satellite The goal was to take photographic images from space and relay them back to Earth via radio Because of technical issues and bureaucratic resistance however WS 117L was seriously behind schedule by the time Sputnik orbited Earth in 1957 and was eventually cancelled The air force began concentrating instead on new programs that eventually launched the first successful U S spy satellites Eyeing the Red Storm examines the birth of space based reconnaissance not from the perspective of CORONA the first photo reconnaissance satellite to fly but rather from that of the WS 117L Robert M Dienesch's revised assessment places WS 117L within the larger context of Dwight D Eisenhower's presidency focusing on the dynamic between military and civilian leadership Dienesch demonstrates how WS 117L promised Eisenhower not merely military intelligence but also the capacity to manage national security against the Soviet threat As a fiscal conservative Eisenhower believed a strong economy was the key to surviving the Cold War and saw satellite reconnaissance as a means to understand the Soviet military challenge more clearly and thus keep American defense spending under control Although WS 117L never flew it provided the foundation for all subsequent satellites breaking theoretical barriers and helping to overcome major technical hurdles which ensured the success of America's first working reconnaissance satellites and their photographic missions during the Cold War Purchase the audio edition *The Taking of K-129* Josh Dean, 2018-09-25 An incredible true tale of espionage and engineering set at the height of the Cold War a mix between *The Hunt for Red October* and *Argo* about how the CIA the U S Navy and America's most eccentric mogul spent six years and nearly a billion dollars to steal the nuclear armed Soviet submarine K 129 after it had sunk to the bottom of the Pacific Ocean all while the Russians were watching In the early hours of February 25 1968 a Russian submarine armed with three nuclear ballistic missiles set sail from its base in Siberia on a routine combat patrol to Hawaii Then it vanished As the Soviet Navy searched in vain for the lost vessel a small highly classified American operation using sophisticated deep sea spy equipment found it wrecked on the sea floor at a depth of 16 800 feet far beyond the capabilities of any salvage that existed But the potential intelligence assets onboard the ship the nuclear warheads battle orders and cryptological machines justified going to extreme lengths to find a way to raise the submarine So began Project Azorian a top secret mission that took six years cost an estimated 800 million and would become the largest and most daring covert operation in CIA history After the U S Navy declared retrieving the sub impossible the mission fell to the CIA's burgeoning Directorate of Science and Technology the little known division responsible for the legendary U 2 and SR 71 Blackbird spy planes Working with Global Marine Systems the country's foremost maker of exotic deep sea drilling vessels the CIA commissioned the most expensive

ship ever built and told the world that it belonged to the reclusive billionaire Howard Hughes who would use the mammoth ship to mine rare minerals from the ocean floor In reality a complex network of spies scientists and politicians attempted a project even crazier than Hughes s reputation raising the sub directly under the watchful eyes of the Russians **Spyplane** Norman Polmar,2001 Book discusses the requirement for and the design development and operation of the U 2 from 1954 when the design began to the current overflights of the Balkans and Iraq Includes extensive discussions of U 2 overflights of hostile countries USSR China North Korea North Vietnam and NASA s use of the U 2 Howard's Whirlybirds: Howard Hughes' Amazing Pioneering Helicopter Exploits Donald J. Porter,2014-03-26 Howard Hughes the movie mogul aviation pioneer and political hound dog has always fascinated the public with his mixture of secrecy dashing lifestyle and reclusiveness Companies responsible for major technological leaps often become household names An exception is Howard Hughes s pioneering helicopter company Hughes Helicopters a name that has fallen into oblivion Yet most schoolboys in the world have heard of the company s prize winning product the Apache helicopter Hughes popularised the light helicopter trainer mass produced the first turbine powered light observation helicopter led the way in hot cycle rotorcraft propulsion research and finally developed the world s most advanced attack helicopter that was purchased and saw service with the UK Here s how some of the world s most innovative helicopters were developed Covering the period from the Second World War until the mid 1980s you will learn why Hughes military aircraft contracts came under close scrutiny by the US government The story is rich with tales of technological breakthrough and test flying bravado made possible by a small crew of engineers and daring pilots Written by a technical expert and insider to the industry Howard s Whirlybirds Howard Hughes Amazing Pioneering Helicopter Exploits is a fascinating and alternative view on the phenomenal pioneer with unpublished photographs and material that will fascinate the aviation and military historian as well as the casual reader and cinema buff

**Sidewinder** Ron Westrum,2013-08-15 In the mid 1950s a small group of overworked underpaid scientists and engineers on a remote base in the Mojave Desert developed a weapon no one had asked for but everyone in the weapons industry desired This is the story of how that unorthodox team led by visionary Bill McLean overcame U S Navy bureaucracy and other more heavily funded projects to develop the world s best air to air missile Author Ron Westrum examines that special time and place when the old American work ethic and can do spirit were a vital part of U S weapons development to discover how this dedicated team was able to create a simple and inexpensive missile Today many decades after its invention the Sidewinder missile is still considered one of the best that America has to offer In a time of billion dollar weapons development contracts astronomical cost overruns and defense acquisitions scandals this revealing highly readable tale about one of the most successful weapons in history should be of interest to anyone concerned with national security

**American Defense Policy** Miriam Krieger,Lynne Chandler Garcia,Lynne M. Chandler Garcia,John Riley,Will Atkins,2021-08-10 Organized into three parts the ninth edition traces the impact that societal changes and emerging

technologies are having as force enablers game changers or disrupters of American defense policy     Archangel David Scott Robarge,2007     Radar Man Edward Lovick,2010-10-07 During the 1950s the United States and the Soviet Union teetered on the brink of nuclear devastation Americas hope for national security relied solely upon aerial reconnaissance Radar Man is the fascinating memoir of a physicist who with his colleagues developed the stealth technology that eventually created radar invisible aircraft Edward Lovick shares a compelling story from the perspective of an enthusiastic scientist that highlights his pioneering experiences in an innovative secret world as he helped create stealth aircraft such as the A 12 OXCART SR 71 Blackbird and F 117 Nighthawk From the moment in 1957 when Lockheeds famous aircraft designer Clarence L Kelly Johnson invited Lovick to join his Skunk Works Lovick details how he helped the CIA eventually perform vital covert reconnaissance flights over Soviet held territory during the Cold War saved Lockheed ADPs A 12 from cancellation and provided key design input to the SR 71 and F 117 Lovicks autobiography describing his career as an engineering physicist in the Skunk Works not only draws attention to the insurmountable challenges that accompanied the task of developing radar invisible aircraft but also the importance of the monumental task these young scientists fulfilledall with the hope of creating a secure future for their beloved country
