Organizational Simulation William B. Rouse, Kenneth R. Boff, 2005-07-08 From modeling and simulation to games and entertainment With contributions from leaders in systems and organizational modeling behavioral and social sciences computing and visualization and gaming and entertainment *Organizational Simulation* both articulates the grand vision of immersive environments and shows in detail how to realize it This book offers unparalleled insight into the cutting edge of the field since it was written by those who actually researched designed developed deployed marketed sold and critiqued today's best organizational simulations The coverage is divided into four sections Introduction outlines the need for organizational simulation to support strategic thinking design of unprecedented systems and organizational learning including the functionality and technology required to enable this support Behaviors covers the state of knowledge of individual group and team behaviors and performance how performance can best be supported how performance is affected by national differences and how organizational performance can best be measured Modeling describes the latest approaches to modeling and simulating people groups teams and organizations as well as narrative contexts and organizational environments within which these entities act drawing from a rich set of modeling methods and tools Simulations and Games illustrates a wide range of fielded simulations games and entertainment including the methods and tools employed for designing developing deploying and evaluating these systems as well as the social implications for the associated communities that have emerged Addressing all levels of organizational simulation architecture with theories and applications and enabling technologies for each *Organizational Simulation* offers students and professionals the premier reference and practical toolbox for this dynamic field Emerging Solutions for Future Manufacturing Systems Luis M.

Camarinha-Matos, 2006-01-04 Industries and particularly the manufacturing sector have been facing difficult challenges in a context of socio economic turbulence characterized by complexity as well as the speed of change in causal interconnections in the socio economic environment In order to respond to these challenges companies are forced to seek new technological and organizational solutions In this context two main characteristics emerge as key properties of a modern automation system agility and distribution Agility because systems need not only to be flexible in order to adjust to a number of a priori defined scenarios but rather must cope with unpredictability Distribution in the sense that automation and business processes are becoming distributed and supported by collaborative networks *Emerging Solutions for Future Manufacturing Systems* includes the papers selected for the BASYS 04 conference which was held in Vienna Austria in September 2004 and sponsored by the International Federation for Information Processing IFIP **Production Systems and Supply Chain**

Management in Emerging Countries: Best Practices Gonzalo Mejía, Nubia Velasco, 2012-05-31 The book presents several highly selected cases in emerging countries where the production logistics systems have been optimized or improved with the support of mathematical models The book contains a selection of papers from the 5th International Conference on

Production Research ICPR Americas 2010 held on July 21 23 in Bogot Colombia The main topic of the conference was Technologies in Logistics and Manufacturing for Small and Medium Enterprises which is perfectly aligned with the realities of emerging countries The book presents methodologies and case studies related to a wide variety of production logistics systems such as diary production auto parts steel and iron production and financial services It is focused but not limited to Small Medium Enterprises

Control of Traffic Systems in Buildings Sandor A. Markon,Hajime Kita,Hiroshi Kise,Thomas Bartz-Beielstein,2006-11-22 Transportation systems in buildings are part of everyday life whether ferrying people twenty storeys up to the office or moving luggage at the airport 21st century society relies on them This book presents the latest in analysis and control of transportation systems in buildings focusing primarily on elevator groups The theory and design of passenger and cargo transport systems are covered with operational examples and topics of special interest **Information**
