COMBO PRE-AMP II

KIT 7370 [9370]

FOR USE WITH: Leslie Two Channel System  
Leslie Speaker Model 122  
Leslie Speaker Model 122, 122P

## INTRODUCTION

The Combo Pre-amp II is designed to amplify and enhance the output from one or two sound sources, such as a music organ and guitar (or a similar organ with two channel channels). Two input channels, each with its own gain and volume control, are provided. Either can be used alone.

The master volume is located near the upper left corner of the pre-amp chassis (Fig. 1). It controls the power to both the pre-amp and the LESLIE speaker. Power to the instrument attached to the pre-amp must be controlled at the instrument itself.

The master volume identified as **RELEASE** restores pre-amp operation in the event of a temporary overload. The circuit breaker acts like a fuse to protect the circuitry. Do not reset the circuit breaker after an overload until the cause of the trouble has been found and corrected.

The two foot-operated switches on the rotary pad control the speed of the tremolo effect in the LESLIE speaker. The **SLOW** switch (left) selects between slow (bottom) and off. The **FAST** switch (right) selects between fast (bottom) and off. The **FAST** switch selects between fast (bottom) and off.

To alternate between slow and fast tremolo, first press the **SLOW** switch until the corresponding indicator (amber) comes on. When the **SLOW** switch is released, pressing the **FAST** switch will cut the speed between slow and fast. To stop the tremolo completely, press the **SLOW** switch until the amber indicator goes out; then press the **FAST** switch to off (the red indicator goes out).
