- $-3mn + 2m$
- $(x) 1 + a + z$
- $(x) 1 + a + z$
- $a + ab - b^2$

Proposed Teaching

- I chose the reciprocal teaching strategy because it allows the students to use their knowledge to teach their peers in an attempt to cement their learning.
- It is the most effective strategy because it goes beyond just explaining the steps to solve the problem but it allows the students to generate questions and apply the material to situations that matter to them.
- Con- When students get into pairs, it is possible they may not use their time effectively and they may have conversations that are off topic. I can combat this by providing the students with a timed guideline of how to spend their time.
