Name: _____ Date: _____

ANSWER KEY

Explain what these terms mean:

Precipitation: Precipitation is water released from clouds in the form of rain, freezing rain, sleet, snow, or hail.

Transpiration: Transpiration occurs when plants take up liquid water from the soil and release water vapor into the air from their leaves.

Evaporation: Evaporation is the process that changes liquid water to gaseous water (water vapor).

Condensation: Condensation is the process where water vapor becomes liquid. It is the reverse of evaporation, where liquid water becomes a vapor.

Accumulation: Accumulation is the process of water collecting in rivers, lakes, streams, oceans and other bodies of water.

36 Deadly Bubishi Points Rand Cardwell, 2019-03-26 Learn how to target the weaknesses of an attacker and effectively exploit them in order to defend yourself The 36 Deadly Bubishi Points explains the pressure point techniques found in the Bubishi the ancient Bible of Karate and how recognizing them allows you to defend yourself against such attacks This book closely examines these vital points and the science behind them and the author fills a gap in general understanding of how the 36 vital points found in the Bubishi can be targeted using pressure point fighting techniques While much has been written about the vital points and

their medicinal importance thanks to the popularity of practices such as acupuncture martial research on the subject has been lacking Cardwell discusses the vital points from the perspective of an experienced martial artist including how the body's vital points are related to the 8 extraordinary vessels and 12 meridians which circulate energy throughout the body Through detailed step by step instructions and over 96 photographs and illustrations The 36 Deadly Bubishi Points shows how this knowledge can be employed in self defense

The Science of Water Frank R. Spellman, 1998-03-09 Water is a limited resource The average person might ask how this can be We are literally shrouded in water water covers most of the earth water water water everywhere you look there is water Obviously this person does not live in or is not familiar with arid and semi arid parts of the globe Maybe our viewer is referring to the hydrologic cycle that natural process of rainfall runoff evaporation which repeats itself continuously we can only hope that it continues to do so Our viewer is not alone in his/her assessment of water the state of water the fact is most people do not give water a second thought A belief prevails that the earth's finite water resources can be increased constantly to meet growing demands At the present time the supply of water is constantly made to respond to demand Modern technology has allowed us to tap potable water supplies and to design and construct elaborate water distribution systems We have developed technology to treat water we foul soil pollute discard and flush away History has demonstrated that consumption and waste increase in response to rising supply But the fact remains fresh waters are a finite source one that can be increased only slightly through desalinization or some other practice all at tremendous cost If water is so precious so necessary for sustaining life then two questions arise 1 Why do we ignore water 2 Why do we abuse it pollute or waste it We ignore water because it is so common so accessible so available so unexceptional unless you are lost in the desert without a supply of it that we don't have to think about it Why do we pollute and waste water Several reasons are discussed in this text This text deals with the essence of water what water is and what water is all about While this text points out that water is one of the simplest and most common chemical compounds on earth it is also one of the most mysterious and awe inspiring substances we know Essential to this discussion of water and its critical importance on earth is man man and his use misuse and reuse of fresh water and wastewater Since water is the essence of all life on earth it is precious too precious to abuse misuse and ignore The common thread woven through the fabric of this presentation is water resource utilization and its protection
