Systems Design: Process Costing

Solutions to Questions

4-1 A process costing system should be used in situations where a homogeneous product is produced on a continuous basis.

4-2

1. Job-order costing and process costing have the same basic purposes—to assign materials, labor, and overhead cost to products and to provide a mechanism for computing unit product costs.
2. Both systems use the same basic manufacturing accounts.
3. Costs flow through the accounts in basically the same way in both systems.

4-3 Cost accumulation is simpler under process costing because costs only need to be assigned to departments—not separate jobs. A company usually has a small number of processing departments, whereas a job-order costing system often must keep track of the costs of hundreds or even thousands of jobs.

4-4 In a process costing system, a Work in Process account is maintained for each separate processing department.

4-5 The journal entry would be:
Work in Process, Firing..... XXXX
 Work in Process, Mixing XXXX

4-6 The costs that might be added in the Firing Department include: (1) costs transferred in from the Mixing Department; (2) materials costs added in the Firing Department; (3) labor costs added in the Firing Department; and (4) overhead costs added in the Firing Department.

4-7 Under the weighted-average method, equivalent units of production consist of units transferred to the next department (or to finished goods)

during the period plus the equivalent units in the department's ending work in process inventory.

4-8 The company will want to distinguish between the costs of the metals used to make the medallions, but the medals are otherwise identical and go through the same production processes. Thus, operation costing is ideally suited for the company's needs.

4-9 Under the weighted-average method, each unit transferred out of the department is counted as one equivalent unit—regardless of in what period the work was done to complete the units. Under the FIFO method, only the work done in the current period is counted. Units transferred out are divided into two parts. One part consists of the units in the beginning inventory. Only the work needed to complete these units is shown as part of the equivalent units for the current period. The other part of the units transferred out consists of the units *started and completed* during the current period.

4-10 The weighted-average method mixes costs from the current period with costs from the prior period. Thus, under the weighted-average method, the department's apparent performance in the current period is influenced to some extent by what happened in a prior period. In contrast, the FIFO method cleanly separates the costs and work of the current period from those of the prior period. This makes the FIFO method superior to the weighted-average method for cost control because current performance should be measured in relation to costs of the current period only.

4-11 Operating departments are the units in an organization within which the central purposes of the organization are carried out; these de-

Management Accounting Carsten Berkau, 2023-09-25 *Management Accounting* is a textbook for business management study programmes. It covers the international syllabus of cost accounting and controlling on bachelor's and master's levels. Prof. Berkau has more than 25 years of teaching experience in Germany, UAS Osnabrück and at international universities in South Africa, Malaysia, China, the Netherlands and South Korea. The textbook strictly follows a case study based approach. All methods are discussed by easily understandable cases. The calculations demonstrate how to apply management accounting step by step. In the first chapters, the case study PENOR PLC about a British windows doors manufacturer explains the differences between financial accounting IFRSs and management accounting. In the next following sections, the textbook covers two points of view: 1. a controlling view with budgeting, cost volume profit analysis, degree of operating leverage, investment appraisal, mergers and cross border acquisitions and risk valuation Monte Carlo Simulation. 2. a cost accounting view that covers management accounting systems, flexible budgeting, cost allocation methods, performance measurement, monitoring, reporting, product calculation, manufacturing accounting, job order and process costing, activity based costing, target costing and contribution margin accounting. On the UVK website, numerous exam tasks with complete solutions, further study materials and links to video clips produced by Prof. Berkau are available for download. **Solutions to Problems in**

Heuristic Reasoning in Management Accounting Jörn Sebastian Basel, Jörn Basel, 2012 Heuristics are short cuts and deliberately ignore information for instance through examining fewer cues or integrating less information However this collides with a view on management accountants and controllers as rational agents which seems to suggest that all available information should be considered As their role as information supplier is often accompanied with the task to assist managers in their judgment and decision making they have huge influence on these processes Therefore it is of high relevance to know if how and which heuristics management accountants and controllers use Furthermore we need to know which individual and situational factors influence their usage of heuristics With a series of five empirical studies applying a mixed methods research design the author sheds light to these research questions and addresses some central claims of the potential biases but also the stunning benefits of relying on heuristic reasoning Central to his discussion are dual process approaches which are debated in cognitive psychology Scholars of these approaches claim that we should distinguish between two distinct processes or systems of the human mind Following this interpretation heuristics are processes which are described as intuitive automatic fast and unconscious They are routinized cognitive processes which are based on experience in certain social environments and thus often exhibit ecological rationality Overall this book picks up an up to date topic in behavioural accounting research which not only is of relevance for researchers but as well for practitioners

True Cost Accounting for Food Barbara Gemmill-Herren, Lauren E. Baker, Paula A. Daniels, 2021-06-22 This book explains how True Cost Accounting is an effective tool we can use to address the pervasive imbalance in our food system Calls are coming from all quarters that the food system is broken and needs a radical transformation A system that feeds many yet continues to create both extreme hunger and diet related diseases and one which has significant environmental impacts is not serving the world adequately This volume argues that True Cost

Accounting in our food system can create a framework for a systemic shift What sounds on the surface like a practice relegated to accountants is ultimately a call for a new lens on the valuation of food and a new relationship with the food we eat starting with the reform of a system out of balance From the true cost of corn rice and water to incentives for soil health the chapters economically compare conventional and regenerative more equitable farming practices in and food system structures including taking an unflinching look at the true cost of cheap labour Overall this volume points towards the potential for our food system to be more human centred than profit centred and one that has a more respectful relationship to the planet It sets forth a path forward based on True Cost Accounting for food This path seeks to fix our current food metrics in policy and in practice by applying a holistic lens that evaluates the actual costs and benefits of different food systems and the impacts and dependencies between natural systems human systems agriculture and food systems This volume is essential reading for professionals and policymakers involved in developing and reforming the food system as well as students and scholars working on food policy food systems and sustainability
