Price,2019-01-15 When President Barack Obama announced the assassination of Osama bin Laden many Americans hoped
the killing of al Qaida s leader would sound the death knell for the organization Since 9 11 killing and capturing terrorist
leaders has been a central element in U S counterterrorism strategy This practice known as leadership decapitation is based
on the logic that removing key figures will disrupt the organization and contribute to its ultimate failure Yet many scholars
have argued that targeted killings are ineffective or counterproductive questioning whether taking out a terror network s
leaders causes more problems than it solves In Targeting Top Terrorists Bryan C Price offers a rich data driven examination
of leadership decapitation tactics providing theoretical and empirical explanations of the conditions under which they can be
successful Analyzing hundreds of cases of leadership turnover from over two hundred terrorist groups Price demonstrates
that although the tactic may result in short term negative side effects the loss of top leaders significantly reduces terror
groups life spans He explains vital questions such as What factors make some terrorist groups more vulnerable than others Is
it better to kill or capture terrorist leaders How does leadership decapitation compare to other counterterrorism options With
compelling evidence based on an original dataset along with an in depth case study of Hamas Targeting Top Terrorists
contributes to scholarship on terrorism and organizational theory and provides insights for policy makers and practitioners
on some of the most pressing debates in the field
