Managing The Secondary School:

Managing the Secondary School Mrs Joan Dean, Joan Dean, 2012-10-12 This new edition of Managing the Secondary School brings up to date the consideration of the talks and skills of the headteacher which was a feature of the first edition. The book deals with all aspects of the headteachers role including marketing the school and managing the budget. It also deals in some detail with the problems of managing change and with the role of governors and parents in today's schools. Throughout the book Joan Dean considers the implications of the Education Reform Act and the National Curriculum. Managing the Secondary School is essential reading for practising and aspiring headteachers of secondary schools. It will also appeal to school governors, advisers, inspectors and consultants working with secondary schools and to those concerned with the appraisal and training of headteachers. Development in the Secondary School Chris Day, Roger Moore, 2018-05-11 Originally published in 1986. Those involved in management in schools are being urged to develop their management skills and many courses are developed for this purpose. At the same time many new issues have arisen which require attention from managers in schools. These include staff appraisal, curriculum evaluation and action research. This book examines major topics of present concern in the management of secondary schools. It presents much new thinking on these major problems and reports on particular initiatives. The aim is to help improve practice both by helping trainers focus their courses correctly and by encouraging those involved in school management to approach their work more purposefully. School management is treated from the perspective of the industrial trainer, the Local Education Authority, higher education and the school practitioner. **The Art of Middle Management in Secondary Schools** Peter Fleming, 2013-12-19 First Published in 2000. The skills required to be an effective middle manager in a secondary school are many and varied but people management skills lie at the heart of getting the best out of both teachers and pupils. Motivating people and building a collaborative team ethos are at the core of effective management. This book is about how middle managers can contribute to raising the quality of education in their schools through proficient team leadership. Governance, Management, and Accountability in Secondary Education in Sub-Saharan Africa World Bank, 2008-02-14 Increasingly the role of management and governance is recognized as important for providing and delivering effective services at all levels of education. In view of the growing demand for more and better services at secondary education levels these are crucial issues that must be addressed urgently. Sub-Saharan Africa's secondary education and training systems must become more efficient and more effective. The current unit costs of junior and senior secondary education in most African countries prevent massive expansion of post primary education. This demands a holistic approach to governance and management issues. In parallel there is a demand from civil society and governments for greater accountability. This study aims to present best practices and identify sustainable development plans for expansion and improved quality and efficiency in the delivery of secondary education in Sub-Saharan Africa through better governance.
