Maneb 2015biology Paper 2

**Benoit Roig,Karine Weiss,Veronique
Thireau**

Maneb 2015biology Paper 2:

Management of Emerging Public Health Issues and Risks Benoit Roig, Karine Weiss, Veronique Thireau, 2018-11-13

Management of Emerging Public Health Issues and Risks Multidisciplinary Approaches to the Changing Environment addresses the threats facing the rapidly changing world and provides guidance on how to manage risks to population health. Unlike conventional and recognized risks, major industrial and natural emerging risks are characterized by low or non-existent scientific knowledge, high levels of uncertainty, and different levels of acceptability by the relevant authorities and exposed populations. Emerging risk must be analyzed through multiple and crossed approaches, identifying the phenomenon linked to the emergence of risk but also by combining scientific policy and social data in order to provide more enlightened decision making. Management of Emerging Public Health Issues and Risks Multidisciplinary Approaches to the Changing Environment provides examples of transdisciplinary approaches used to characterize, analyze, and manage emerging risks. This book will be useful for public health researchers, policy makers, and students, as well as those working in emergency management, risk management, security, environmental health, nanomaterials, and food science. Presents emerging risks from the technological, environmental, health, and energy sectors, as well as their social impacts. Contextualizes emerging risks as new threats, existing threats in new locations, and known issues which are newly recognized as risks due to increased scientific knowledge. Includes case studies from around the world to reinforce concepts. *Government reports annual index*, 199?
