**Brain Plasticity and Learning** Jennifer Anne Hawkins, 2021-11-08 This book synthesizes the latest findings on neuroplasticity and learning drawing on rich phenomenological research carried out with teachers psychologists parents and students from around the world to examine the implications for current teaching and for the advancement of learning methods Building on the author's previous work in this area the volume considers in depth the function of feelings and emotions in neuroplastic cognition and provides an analysis of curriculum debates and assessment systems in the light of neuroplasticity The final chapters explore the implications of brain plasticity outside of structured learning environments and in society at large The book will appeal to students and scholars of psychology and education as well as to educational psychologists coaches teachers and educational leaders

Educational Research for Social Justice Alistair Ross, 2021-06-22 This book presents a series of analyses of educational policies largely in the UK but some also in Europe researched by a team of social scientists who share a commitment to social justice and equity in education We explore what social justice means in educational policy and practice and how it impacts on our understanding of both educational science and the public good Using a social constructivist approach the book argues that social justice requires a particular and critical analysis of the meaning of meritocracy and of the way this term turns educational policies towards treating learning as a competition in which many young people are constructed as losers We discuss how many terms in education are essentialised and have specific and different meanings for particular social groups and how this may create issues in both quantitative survey methods and in determining what is the public good We discuss social justice across a range of intersecting social characteristics including social class ethnicity and gender as they are applied across the educational policy spectrum from early years to postgraduate education We examine the ways that young people construct their identities and the implications of this for understanding the public good in educational practice We consider the responsibilities of educational researchers to acknowledge these issues and offer examples of researching with such a commitment We conclude by considering how educational policy might contribute to a socially just equitable and inclusive public good
