accurately Thus CNS provides for the first time an ability to check statistics stability of chaos leading to a completely new concept of ultra chaos which has both trajectory instability and statistics instability and thus is of a higher disorder Notably it is impossible to repeat experimental results of ultra chaos even in the statistical sense However the reproducibility of physical experiments forms a cornerstone for modern science Thus ultra chaos reveals an incompleteness of the modern science paradigm In addition it also reveals statistics stability as a precondition for use of conventional algorithms including direct numerical simulation DNS In Clean Numerical Simulation several conjectures and open problems are proposed including a modified fourth Clay millennium problem Indeed CNS opens the door for us to enter the clean numerical world of chaos and turbulence
