Matric 2014 Business Studies June Exam:

Assessing Academic Literacy in a Multilingual Society Albert Weideman, John Read, Theo du Plessis, 2020-11-02 South African universities face major challenges in meeting the needs of their students in the area of academic language and literacy. The dominant medium of instruction in the universities is English and to a much lesser extent Afrikaans but only a minority of the national population are native speakers of these languages. Nine other languages can be media of instruction in schools which makes the transition to tertiary education difficult enough in itself for students from these schools. The focus of this book is on procedures for assessing the academic language and literacy levels and needs of students not in order to exclude students from higher education but rather to identify those who would benefit from further development of their ability in order to undertake their degree studies successfully. The volume also aims to bring the innovative solutions designed by South African educators to a wider international audience.

Non-Cognitive Factors and Learning within a Business Simulation Tanja Kreitenweis, 2021-10-22 Serious games can provide a convenient and straightforward access to complex knowledge for all age groups. However, learning achievements depend largely on learners' non-cognitive factor disposition. With the aim of combining the fields of serious games and non-cognitive factors, this research focuses on the use of a business simulation which conveys change management insights. Business simulations are a subset of serious games and are perceived as a non-traditional learning method. The objectives of this work are versatile: 1. developing a scale which measures learners' knowledge and skills increase gained from a business simulation; 2. investigating the effects of non-cognitive factors on learning in this business simulation environment; and 3. exploring the moderating role of team preference in this type of learning setting. Using the newly developed scale, this work finds that learners' skills and knowledge states are more pronounced after playing the business simulation.

Progress Toward Agenda 2030 Danielle Lane, Nicholas Catania, Sarah Semon, 2023-09-20 At the midway point towards the United Nations UN Agenda 2030, this critical volume focuses on how a range of contextually diverse countries are progressing towards inclusive education. Contributors critically consider the current state of inclusive education in their own countries in relation to meeting the UN's Agenda 2030 initiative and Sustainable Development Goal 4. The foundation is set in chapter one by the editors with a historical overview of inclusion and inclusive policies globally. Key international scholars critique the history and status of inclusion in their respective contexts. In reference to local research, they explore the history of inclusion, the current policies and state of inclusion barriers and levers for inclusion and look towards the future of inclusive education. Chapters demonstrate how the continued call for a shift towards inclusive education in different countries is extremely complex and varies greatly within each international context. Attention is given to levers promoting inclusion through contextually appropriate international initiatives and the importance of the realignment of policies and practices if all countries are to achieve the 2030 UN's education goal. *Progress Toward Agenda 2030* serves to challenge all educational stakeholders to critically consider, analyze,

and innovate policies and practices for inclusive education for all by 2030 The Saturday Review of Politics, Literature, Science and Art ,1864 Irish Education Antonia McManus,2014-07-07 In this important new work the author analyses the contributions that our Ministers for Education made to the Irish education system between the years 1919 and 1999 Covering the social economic and political realities of the time and taking in the involvement of the OECD what emerges is a picture of how Irish education was shaped and moulded over the course of the twentieth century **Business Studies** ,2008
