

## The Benefits of Free Trade

- Low prices for consumers
- Greater choices for consumers
- Producers can benefit from economies of scale
- More efficient allocation of resources
- Countries can consume combinations of goods outside their production possibilities curve through specialization
- Transfer of knowledge; diffusion of technology
- Political benefits: "peace dividend"

## Absolute and Comparative Advantage

- **Absolute advantage** — the ability of a country to produce a greater amount of a good with the same resources

- Assuming inputs are the same, Country B should specialize and export good X, and Country A should specialize and export good Y

- **Comparative advantage** — the ability to produce a particular good at a lower opportunity cost than other countries

- Country A has the absolute advantage as it can produce more of both goods
- Since PPFs are not parallel, opportunity costs are not the same
- $\therefore$  room for specialization
- $\therefore$  comparative advantage

## ASSUMPTIONS OF COMPARATIVE ADVANTAGE THEORY

- Only two countries
- Produce homogeneous goods
- No transport costs
- Perfect competition in all markets; perfect information
- Free trade (no trade barriers)

## The World Trade Organization

- **World Trade Organization (WTO)** — an international institution aiming at promoting free trade by persuading countries to establish import tariffs and other barriers
- Functions:
  - promote trade liberalization
  - settle trade disputes and ensure they are followed
  - administrator of trade-related disciplines
- Criticisms:
  - biased towards US and EU
  - inconsistent to needs of developing countries
  - pays insufficient attention to child labour, health, environment, and workers' rights

## Types of Trade Restrictions

- **Tariff** — a tax imposed on imports aimed at restricting their flow into the country
- **Quota** — a quantitative restriction on the volume of imports
- **Subsidy** — a payment made by governments to firms as a form of financial aid

## TARIFF

## QUOTA

- Domestic producer's revenue: from  $S$  to  $S + Q$
- Foreign producer's revenue: from  $D + Q$  to  $D$
- $\therefore$  better for foreign producer than tariff

## SUBSIDY

- Domestic producer's revenue: from  $S$  to  $S + Q$
- Foreign producer's revenue: from  $D + Q$  to  $D$
- Consumer paying the same before and after subsidy

**Political, Economic and Financial Country Risk** Mohamed A. Ramady, 2013-10-19 Decades go by and nothing happens then weeks go by and decades happen This apt saying encapsulates the dramatic convulsions taking place across the Arab world that first erupted in 2011 in Tunisia and which rapidly spread to other countries These events have affected the lives of ordinary citizens in many more ways than had been intended when the Arab Spring broke out with the endgame still not very clear as demonstrated in countries like Egypt Syria and Libya By comparison with some exceptions the six countries comprising the Gulf Cooperation Council have been relatively unaffected by the general turbulence and uncertainties lapping around them However geopolitical shifts involving global superpower rivalries combined with revolutionary breakthroughs in the non conventional hydrocarbon energy sector are threatening to challenge the importance of the Arabian Gulf as the world's leading suppliers of energy putting their economies under fiscal stress The author examines such challenges by Providing the first in depth statistical analytical assessment of the GCC countries using monthly data over the period 2001-2013 for the three risk categories economic financial and political risks and their sub components so as to enable policymakers enhance components with low risk while addressing components with perceived higher risk Assessing FDI and capital inflows and outflows before and after the Arab Spring and how to encourage FDI inflows Inter Arab and GCC trade and synergies in power transmission transportation links and establishing new hubs of centers of manufacturing excellence Exploring private sector led growth models to reduce forecasted unemployment Being complacent is not an option for the GCC The aim of the book is that having a better understanding of each of the GCC countries individual risk parameters will enable the GCC meet future challenges and reduce the chances of a negative Arab Spring occurring in the region Mohamed Ramady is a Visiting Associate Professor at the Department of Finance and Economics King Fahd University of Petroleum and Minerals His main research interests are the economics of the Middle East and Saudi Arabia in particular as well as money and banking He also held senior positions with international financial institutions in the Arabian Gulf and Europe

**The Political Economy of City Branding** Ari-Veikko Anttiroiko, 2014-02-24 Globalization affects urban communities in many ways One of its manifestations is increased intercity competition which compels cities to increase their attractiveness in terms of capital entrepreneurship information expertise and consumption This competition takes place in an asymmetric field with cities trying to find the best possible ways of using their natural and created assets the latter including a naturally evolving reputation or consciously developed competitive identity or brand The Political Economy of City Branding discusses this phenomenon from the perspective of numerous post industrial cities in North America Europe East Asia and Australasia Special attention is given to local economic development policy and industrial profiling and global city rankings are used to provide empirical evidence for cities characteristics and positions in the global urban hierarchy On top of this social and urban challenges such as creative class struggle are also discussed The core

message of the book is that cities should apply the tools of city branding in their industrial promotion and specialization but at the same time take into account the special nature of their urban communities and be open and inclusive in their brand policies in order to ensure optimal results This book will be of interest to scholars and practitioners working in the areas of local economic development urban planning public management and branding [Back to the future of Socialism](#) Hain, Peter, 2015-01-26 What's gone wrong with capitalism and how should governments respond Did Big Government or Big Banking cause the global financial crisis Is the answer austerity or investment in growth untrammelled market forces or regulating for the common good Anthony Crosland's *The Future of Socialism* 1956 provided a creed for governments of the centre left until the global banking crisis Now Peter Hain with over 50 years experience in politics revisits this classic text and presents a stimulating political prospectus for today Hain argues that capitalism is now more financially unstable and unfair productive but prone to paralysis dynamic but discriminatory A rousing alternative to the neoliberal right wing orthodoxy of our era Hain's new book should be read by everyone interested in the future of the left [The Great Surge](#) Steven Radelet, 2016-11-22 The untold story of the global poor Powerful lucid and revelatory *The Great Surge* offers indispensable prescriptions about sustaining global economic progress into the future George Soros chairman of Soros Fund Management We live today at a time of great progress for the global poor Never before have so many people in so many developing countries made so much progress in so short a time in reducing poverty increasing incomes improving health reducing conflict and war and spreading democracy Most people believe the opposite that with a few exceptions like China and India the majority of developing countries are hopelessly mired in deep poverty led by inept dictators and have little hope for change But a major transformation is underway and has been for two decades now Since the early 1990s more than 700 million people have been lifted out of extreme poverty six million fewer children die every year from disease tens of millions more girls are in school millions more people have access to clean water and democracy often fragile and imperfect has become the norm in developing countries around the world A terrific book Nick Kristof *The New York Times* *The Great Surge* chronicles this unprecedented economic social and political transformation It shows how the end of the Cold War the development of new technologies globalization and courageous local leadership have combined to improve the fate of hundreds of millions of people in poor countries around the world Most importantly *The Great Surge* reveals how we can accelerate the progress [The Competitive Effects of Minority Shareholdings](#) Panagiotis Fotis, Nikolaos Zevgolis, 2016-04-07 The objective of this book is twofold First it presents the economics of minority shareholdings under both merger and antitrust law In particular economic analysis provides both an overall assessment of minority shareholdings in the context of concentrations and Articles 101 and 102 TFEU and the examination of the link between non controlling minority shareholdings merger control and antitrust law Second the book also provides a legal assessment and an analysis of selected case law According to settled European case law minority shareholdings are analysed not only under Regulation 139/2004

but also under Articles 101 and 102 TFEU Nevertheless according to current enforcement practice at European and international levels several national competition authorities have adopted different approaches The million dollar question is whether the existing regulatory framework is sufficient to cover all possible cases In summary the book will be a useful tool for students practitioners researchers economic and legal experts and competition authorities It provides a comprehensive survey of the subject which has been missing until now and answers many questions that have been raised in the literature in the last decades

**Broadway and Economics** Matthew C. Rousu, 2018-06-27 Economics has often been described as the dismal science with TV and movies reinforcing this description However economics is a powerful tool that can be used to understand how the world works helping to answer confusing puzzles and solve the world's problems Surprisingly Broadway musicals are an excellent way to show this Musicals tell engaging stories through song and many are rich with economic concepts This book analyzes 161 songs from 90 musicals to explore what they can teach us about supply and demand monetary policy and numerous other core economic concepts While some songs have an obvious connection to economics other connections may seem less apparent When you hear Let it Go from Frozen does your mind think about a firm's production decisions After reading this book it will Whether showing how Hamilton can illustrate concepts of central banking or how Stars from Les Miserables provides a perfect example of inelastic demand the author presents complicated topics in an understandable and entertaining way Featuring classic songs from some of the most popular shows ever produced along with some hidden gems Broadway and Economics will be of interest to anybody studying an introductory economics course as well as theatre aficionados
