

A level Applied Paper 3B Mechanics Practice Paper M13 MARK SCHEME

Question 1

Question Number	Scheme	Mark
(a)	$240 = \frac{1}{2}(u + 34)10$ $u = 14$	M1 A1 A1 (3)
(b)	$34 = 14 + 10a \Rightarrow a = 2$ $120 = 14t + \frac{1}{2} \times 2 \times t^2$ $t^2 + 14t - 120 = 0$ Solving, $t = -20$ or 6 $t = 6$	M1 A1 M1 A1 DM1 A1
	OR $34 = 14 + 10a \Rightarrow a = 2$ $v^2 = 14^2 + 2 \times 2 \times 120 \Rightarrow v = 26$ AND $26 = 14 + 2t$ $t = 6$	M1 A1 M1 A1 DM1 A1
		(6)
		[9]
Notes for Question		
Q (a)	First M1 for a complete method to produce an equation in u only. First A1 for a correct equation. ($u^2 - 48u + 476 = 0$ oe is possible). Second A1 for $u = 14$.	
Q (b)	EITHER First M1 for an equation in a only. (M0 if $v = 34$ when $s = 120$ is used) First A1 for $a = 2$. (This may have been found in part (a)) Second M1 for a 3-term quadratic equation in t only, allow sign errors (must have found a value of a . (M0 if $v = 34$ when $s = 120$ is used) Second A1 for a correct equation. Third M1 dependent on previous M1 for solving for t . Third A1 for $t = 6$ OR First M1 for an equation in a only. First A1 for $a = 2$. (This may have been found in part (a)) Second M1 for a complete method to obtain an equation in t only, allow sign errors. (must have found a value of a) Second A1 for a correct equation. Third M1 dependent on previous M1 for solving for t . Third A1 for $t = 6$

The Roles of Social Media in Education: Affective, Behavioral, and Cognitive Dimensions Hung Phu Bui, Mark Bedoya Ulla, Veronico N. Tarrayo, Chien Thang Pham, 2023-10-24 technologies in education A large body of research has attempted to measure the extent to which social media change human communication In education researchers and educators have employed social media to increase students engagement inside and outside the classroom They have been exploring the effects of the use of social media on the learning outcome and learners beliefs and experiences However some of their endeavors are inconclusive As the effects of social media in education are context sensitive research results reflecting different contexts around the world will contribute to the literature on social media and education Student engagement in learning a growing interest in educational research is widely believed to contribute to the success of learning The contemporary literature shows that students can engage in learning affectively behaviorally and cognitively Recent studies are also interested in using technology to mediate students social and metacognitive engagement in learning As student engagement is a multidimensional area interdisciplinary studies have recently expanded their literature The use of social media to increase student engagement in learning remains underexplored

The Big Book of Mars Marc Hartzman, 2020-07-07 The most comprehensive look at our relationship with Mars yesterday today and tomorrow through history archival images pop culture ephemera and interviews with NASA scientists for fans of Andy Weir and For All Mankind Mars has been a source of fascination and speculation ever since the ancient Egyptians observed its blood red hue and named it for their god of war and plague But it wasn't until the 19th century when canals were observed on the surface of the Red Planet suggesting the presence of water that scientists novelists filmmakers and entrepreneurs became obsessed with the question of whether there's life on Mars Since then Mars has fully invaded pop culture inspiring its own day of the week Tuesday an iconic Looney Tunes character and many novels and movies from Ray Bradbury's *Martian Chronicles* to *The Martian* It's this cultural familiarity with the fourth planet that continues to inspire advancements in Mars exploration from NASA's launch of the Mars rover Perseverance to Elon Musk's quest to launch a manned mission to Mars through SpaceX by 2024 Perhaps one day we'll be able to answer the questions our ancestors asked when they looked up at the night sky millennia ago

Geotechnical Engineering of Dams, 2nd Edition Robin Fell, Patrick MacGregor, David Stapledon, Graeme Bell, Mark Foster, 2014-11-21 *Geotechnical Engineering of Dams* 2nd edition provides a comprehensive text on the geotechnical and geological aspects of the investigations for and the design and construction of new dams and the review and assessment of existing dams The main emphasis of this work is on embankment dams but much of the text particularly those parts related to geology can be used for concrete gravity and arch dams All phases of investigation design and construction are covered Detailed descriptions are given from the initial site assessment and site investigation program through to the preliminary and detailed design phases and ultimately the construction phase The assessment of existing

dams including the analysis of risks posed by those dams is also discussed This wholly revised and significantly expanded 2nd edition includes a lengthy new appendix on the assessment of the likelihood of failure of dams by internal erosion and piping This valuable source on dam engineering incorporates the 200 years of collective experience of the authors in the subject area Design methods are presented in combination with their theoretical basis to enable the reader to develop a proper understanding of the possibilities and limitations of a method For its practical well founded approach this work can serve as a useful guide for professional dam engineers and engineering geologists and as a textbook for university students

Handbook of Approximate Bayesian Computation Scott A. Sisson, Yanan Fan, Mark Beaumont, 2018-09-03 As the world becomes increasingly complex so do the statistical models required to analyse the challenging problems ahead For the very first time in a single volume the Handbook of Approximate Bayesian Computation ABC presents an extensive overview of the theory practice and application of ABC methods These simple but powerful statistical techniques take Bayesian statistics beyond the need to specify overly simplified models to the setting where the model is defined only as a process that generates data This process can be arbitrarily complex to the point where standard Bayesian techniques based on working with tractable likelihood functions would not be viable ABC methods finesse the problem of model complexity within the Bayesian framework by exploiting modern computational power thereby permitting approximate Bayesian analyses of models that would otherwise be impossible to implement The Handbook of ABC

provides illuminating insight into the world of Bayesian modelling for intractable models for both experts and newcomers alike It is an essential reference book for anyone interested in learning about and implementing ABC techniques to analyse complex models in the modern world *Conceiving Identities* Kathryn M. Kueny, 2013-10-28 Finalist for the 2014 Book Award for Excellence in the Study of Religion textual studies category presented by the American Academy of Religion *Conceiving Identities* explores how medieval Muslim theologians appropriate a woman's reproductive power to construct a female gender identity in which maternity is a central component Through a close analysis of seventh through fourteenth century exegetical works medical treatises legal pronouncements historiographies zoologies and other literary materials this study considers how medieval Muslim scholars map the female reproductive body according to broader cosmological schemes to generate a woman's role as mother By close consideration of folk medicine and magic this book also reveals how medieval women contest the traditional maternal identities imagined for them and thereby reinvent themselves as mothers and Muslims This innovative examination of the discourse and practices surrounding maternity forges new ground as it takes up the historical and epistemic construction of medieval Muslim women's identities *International and Comparative Criminal Justice* Mark Findlay, 2013-06-19 International criminal justice is in transition This book explores the growing internationalisation of criminal justice as a phenomenon of global governance It provides students with a critical understanding of the international institutions for regulating transnational crime the development of alternative justice processes across the globe and international and supra national co operation criminal justice policies and practices Key topics covered include The historical development of International Criminal Justice institutions and traditions International Restorative Justice Victim communities and collaborative justice The relationship between crime and war International Human Rights The War on Terror The globalisation of crime and control Developments in global governance communitarian justice and accountability This text will familiarize students with the literature and debates surrounding international criminal justice and enable them to critically appreciate their theoretical and policy context In doing so it encourages students to assess the strengths and weaknesses of different approaches to the study of global justice and the analysis of comparative policy convergence and research It will also help students to reflect on and communicate in an informed and critical way theoretical accounts and empirical studies within the field of international criminal justice This book will be essential reading for upper level undergraduates taking courses in criminal law international relations and governance and postgraduates engaged in international criminal justice international law regulation and governance and human rights

information from the complete twelve volume Mark's Encyclopedia in an affordable condensed format Completely revised and updated this user friendly desk reference offers quick access to all areas of polymer science including important advances in nanotechnology imaging and analytical techniques controlled polymer architecture biomimetics and more all in one volume Like the twelve volume full edition the Encyclopedia of Polymer Science and Technology Concise Third Edition provides both SI and common units carefully selected key references for each article and hundreds of tables charts figures and graphs

Free-Surface Flow Nikolaos D. Katopodes, 2018-10-31 Free Surface Flow Computational Methods presents a detailed analysis of numerical schemes for shallow water waves It includes practical applications for the numerical simulation of flow and transport in rivers and estuaries the dam break problem and overland flow Closure models for turbulence such as Reynolds Averaged Navier Stokes and Large Eddy Simulation are presented coupling the aforementioned surface tracking techniques with environmental fluid dynamics While many computer programs can solve the partial differential equations describing the dynamics of fluids many are not capable of including free surfaces in their simulations Provides numerical solutions of the turbulent Navier Stokes equations in three space dimensions Includes closure models for turbulence such as Reynolds Averaged Navier Stokes and Large Eddy Simulation Practical applications are presented for the numerical simulation of flow and transport in rivers and estuaries the dam break problem and overland flow **Being Creative in Primary English** Adrian Copping, 2016-09-19 Why should we foster creativity in primary English A practical and accessible text that demonstrates how creative thinking and learning can support primary English teaching With chapters mapped to the Teachers Standards and links to the new National Curriculum each chapter provides a case study exploring high quality primary English practice including planning rationale and ideas for the classroom These are fully grounded in a wide range of theoretical frameworks viewpoints and values Reflective activities in each chapter offering practical exercises and additional reading suggestions encourage trainee teachers to further their understanding of how theory translates to classroom practice This inspiring book helps support learning teaching and assessment without losing innovation excitement and motivation for both teachers and children

World Development Report 2019 World Bank, 2018-10-31 Work is constantly reshaped by technological progress New ways of production are adopted markets expand and societies evolve But some changes provoke more attention than others in part due to the vast uncertainty involved in making predictions about the future The 2019 World Development Report will study how the nature of work is changing as a result of advances in technology today Technological progress disrupts existing systems A new social contract is needed to smooth the transition and guard against rising inequality Significant investments in human capital throughout a person's lifecycle are vital to this effort If workers are to stay competitive against machines they need to train or retool existing skills A social protection system that includes a minimum basic level of protection for workers and citizens can complement new forms of employment Improved private sector policies to encourage startup activity and competition can help countries compete in the digital age

Governments also need to ensure that firms pay their fair share of taxes in part to fund this new social contract The 2019 World Development Report presents an analysis of these issues based upon the available evidence **Measured**

Cone Penetration Testing 2022 Guido Gottardi,Laura Tonni,2022-06-23 This volume contains the proceedings of the 5th International Symposium on Cone Penetration Testing CPT 22 held in Bologna Italy 8 10 June 2022 More than 500 authors academics researchers practitioners and manufacturers contributed to the peer reviewed papers included in this book which includes three keynote lectures four invited lectures and 169 technical papers The contributions provide a full picture of the current knowledge and major trends in CPT research and development with respect to innovations in instrumentation latest advances in data interpretation and emerging fields of CPT application The paper topics encompass three well established topic categories typically addressed in CPT events Equipment and Procedures Data Interpretation Applications Emphasis is placed on the use of statistical approaches and innovative numerical strategies for CPT data interpretation liquefaction studies application of CPT to offshore engineering comparative studies between CPT and other in situ tests Cone Penetration Testing 2022 contains a wealth of information that could be useful for researchers practitioners and all those working in the broad and dynamic field of cone penetration testing Scientific and Technical Aerospace Reports ,1993 **Superalloys 2020** Sammy Tin,Mark Hardy,Justin Clews,Jonathan Cormier,Qiang Feng,John Marcin,Chris O'Brien,Akane Suzuki,2020-08-28 The 14th International Symposium on Superalloys Superalloys 2020 highlights

technologies for lifecycle improvement of superalloys In addition to the traditional focus areas of alloy development processing mechanical behavior coatings and environmental effects this volume includes contributions from academia supply chain and product user members of the superalloy community that highlight technologies that contribute to improving manufacturability affordability life prediction and performance of superalloys **Deep Learning for Marine Science** Haiyong Zheng,Mark C. Benfield,Hongsheng Bi ,Xuemin Cheng,2024-05-15 Deep learning DL mainly composed of deep and complex neural networks such as recurrent network and convolutional network is an emerging research branch in the field of artificial intelligence and machine learning DL revolution has a far reaching impact on all scientific disciplines and every corner of our lives With continuing technological advances marine science is entering into the big data era with the exponential growth of information DL is an effective means of harnessing the power of big data Combined with

unprecedented data from cameras acoustic recorders satellite remote sensing and large model outputs DL enables scientists to solve complex problems in biology ecosystems climate energy as well as physical and chemical interactions Although DL has made great strides it is still only beginning to emerge in many fields of marine science especially towards representative applications and best practices for the automatic analysis of marine organisms and marine environments DL in nowadays marine science mainly leverages cutting edge techniques of deep neural networks and massive data which collected by in situ optical or acoustic imaging sensors for underwater applications such as plankton classification and coral reef detection This research topic aims to expand the applications of marine science to cover all aspects of detection classification segmentation localization and density estimation of marine objects organisms and phenomena New York Magazine, 1973-01-22 New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country With award winning writing and photography covering everything from politics and food to theater and fashion the magazine s consistent mission has been to reflect back to its audience the energy and excitement of the city itself while celebrating New York as both a place and an idea
