Configuration Note 7007

Avaya Merlin Magix™*

Revised 06/14/01

Inband signaling is
used for integration

Supported Voice Processing
Module

1.0 METHOD OF INTEGRATION

Integration is achieved by Inband signaling. Call forward to personal greeting is achieved via DTMF signals passed from the Avaya Merlin Magix to Octel 100. Message waiting indicators are set and canceled by dialing a feature access code followed by the extension number. A hookflash followed by the extension transfers the caller to the operator.

1.1 SUPPORTED VOICE PROCESSING MODULE

The Octel 100 is a Year 2000 (Y2K) compliant, PC based, enhanced voice messaging product release intended to replace the OPC, Signature Performer, CEO, CP, and CP+ product lines. For installed systems that have port capacities above 16 ports contact your Avaya representative for the proper solution

Buildings Augustus Noll,2017-03-13 From the Preface It would be impossible to exaggerate the importance of good wiring as an element in the prosperity and permanence of the various electrical industries and the writer of the present modest volume believes that his efforts to explain the true principles of good wiring and to point out the best methods will be welcomed cordially by electrical engineers contractors wiremen and the public generally The idea followed in inditing writing these pages has been to draw upon personal experiences ranging over a great many years and to set forth in plain simple language the things that must be done and the things that must be avoided Every part of the subject is treated in such a manner that beginners wiremen and others interested in the practical branches of the art of interior wiring can with a little attention understand readily why certain practices are preferable to others and how a piece of work can be rendered safe and satisfactory It is believed that practical advice from one who has himself tested by actual work and observation the value of every rule and suggestion here offered will be very helpful While much may seem novel no statement is made that practice does not confirm and no method is recommended that experience and common sense do not approve There is as far as possible all avoidance of abstruse technicalities in the descriptions and the divisions have been made with a view to an easier comprehension of the different parts of the subject A special series of drawings has been made for the book which will be appreciated the author thinks in several quarters and many of which have long been needed It is hoped that a perusal of this book may lead many workmen forward to the study of other books that they have hitherto found too technical so that they will then be able to see how close is the relation between good work and sound theory All that the author asks credit for is an earnest desire of which this little book is the expression for the perfection of an art to whose improvement he has devoted all his time and thought *Customer Premises Cabling Manual* Australian Telecommunications Authority,1991 *Cable*
