Foundations of Biophilosophy Martin Mahner, Mario Bunge, 2013-03-14 Over the past three decades the philosophy of biology has emerged from the shadow of the philosophy of physics to become a respectable and thriving philosophical subdiscipline The authors take a fresh look at the life sciences and the philosophy of biology from a strictly realist and emergentist naturalist perspective They outline a unified and science oriented philosophical framework that enables the clarification of many foundational and philosophical issues in biology This book will be of interest both to life scientists and philosophers *This Thing Called Reason* Benjamin K. Akih, 2025-05-06 This book offers a conceptual analysis of reason proposing a plausible theory to resolve persistent vagueness in the historical use of the concept The proposed theory leads to the view that reason is fundamentally subjective and dependent on non inferential matters of faith Despite the inherent

subjectivity we can arrive at a consensus in reasoning exercises because we all participate in a universal minimum religion that grounds all reasoning True atheism is therefore impossible This analysis bears on debates about the relation between faith and reason as well as the relation between ethics based on reason and ethics based on sentiments The book further shows that this new and original view of religiously constrained reason ought to equally inform our thinking about applied ethics such as politics law and economics

Fichte Johann Gottlieb Fichte, 1988. This work is a model of what a philosophical text should be. Reinhard Lauth Breazeale's translation is fluent, precise, and perhaps most important of all, it is readable. This is an excellent translation by the ranking Fichte scholar working in English at present, accompanied by a full, useful scholarly apparatus, likely to be of interest to Fichte scholars and all those concerned with the development of German idealism.

Review of Metaphysics. The publishing of this volume in English provides us with a wealth of new material, not just about Fichte's development but about the essentially Cartesian project that first gave rise to phenomenology in our own century.

The Divine Manifold Roland Faber, 2014-07-30. The Divine Manifold is a postmodern enquiry in

intersecting themes of the concept and reality of multiplicity in a chaosmos that does not refuse a dimension of theopoetics but rather defines it in terms of divine polyphilia the love of multiplicity In an intricate play on Dante's Divine Comedy this book engages questions of religion and philosophy through the aporetic dynamics of love and power locating its discussions in the midst of and in between the spheres of a genuine philosophy of multiplicity This philosophy originates from the poststructuralist approach of Gilles Deleuze and the process philosophical inspirations of Alfred N Whitehead As their chaosmos invites questions of ultimate reality religious pluralism and multireligious engagement a theopoetics of love will find paradoxical dissociations and harmonizations with postmodern sensitivities of language power knowledge and embodiment At the intersection of poststructuralism's and process theology's insights in the liberating necessity of multiplicity for a postmodern cosmology the book realizes its central claim If there is a divine dimension of the chaosmos it will not be found in any identification with mundane forces or supernatural powers but on the contrary in the absolute difference of polyphilic love from creativity Yet the concurrent indifference of love and power its mystical undecidability in terms of any conceptualization will lead into existential questions of the insistence on multiplicity in a world of infinite becoming as inescapable background for its importance and creativeness formulating an ecological and ethical impulse for a mystagogy of becoming intermezzo
