Forensic Face Matching Markus Bindemann, 2021-01-07 In everyday life we identify faces regularly and seemingly with great ease One might assume this to be a straightforward and highly accurate task However we are poor at identifying the faces of unfamiliar people who we have never met before despite the fact that many important everyday tasks depend on this

Forensic face matching requires the comparison of two face photographs of a person who is not known to the observer. This seemingly simple task is critical for a wide range of security tasks such as person identification at airports and borders, passport issuance and renewal and criminal identification in police investigations. Despite its ubiquity, face matching is highly prone to error even under conditions that are designed to maximally facilitate this task. For this reason, face matching has been studied extensively in Psychology, with the bulk of the research conducted since 2010. Forensic face Matching provides readers with a wide ranging detailed and critical overview of facial comparison and face matching, providing insights into its application, efficacy and limitations in occupational settings and of current scientific knowledge of this task. Anthropology of Sport Niko Besnier, Susan Brownell, Thomas F. Carter, 2017-12-08 Few activities bring together physicality, emotions, politics, money and morality as dramatically as sport. In Brazil's stadiums or China's parks, on Cuba's baseball diamonds or Fiji's rugby fields, human beings test their physical limits, invest emotional energy, bet money, perform witchcraft and ingest substances. Sport is a microcosm of what life is about. The Anthropology of Sport explores how sport both shapes and is shaped by the social, cultural, political and historical contexts in which we live. Core themes discussed in this book include the body, modernity, nationalism, the state, citizenship, transnationalism, globalization and gender and sexuality.

Criminal Justice and Regulation Revisited Lennon Y.C. Chang, Russell Brewer, 2018-05-08 This volume brings together leading researchers to celebrate the significant contributions of Peter Grabosky to the field of Criminology and in particular his work developing and adapting regulatory theory to the study of policing and security. Over the past three decades, his path-breaking theoretical and empirical research has contributed to a burgeoning literature on the myriad ways regulatory systems drive state and non-state interactions in an effort to control crime. This collection of essays showcases Grabosky's pioneering treatment of key regulatory concepts as they relate to such interactions and illustrates how his work has been instrumental in shaping contemporary scholarship and practice around the governance of security. Revisiting the work of a key figure in the field, this book will be of interest to criminologists, sociologists, socio-legal studies and those engaged with security and policy studies.
