- Student white boards or notebooks

Attachments

- [Solve for Missing Numbers \(PDF\)](#)

Introduction (5 minutes)

- Draw a number bond on the board with the number 5 in the large circle and number 2 in one of the smaller circles.
- Ask students to turn and talk to a neighbor about what number they think goes in the other circle.
- Take responses from the students. Ask them to share their reasoning. Record strategies on a piece of chart paper.
- Now do the same process with 12 in the large circle and 10 in one of the smaller circles, giving time to discuss, share, and explain their thinking. Add any new strategies to chart paper.
- Explain that the thinking they are using now will come in handy as they learn to find missing numbers in a subtraction problem.

Explicit Instruction/Teacher modeling (10 minutes)

- Pass out individual student whiteboards or have students work in math notebooks.
- Do another example like the ones you just did with the number 40 in the large circle and 25 in the smaller circle. Discuss and share.
- It is important that students see that the same logic and strategies can be applied even as the numbers get bigger.
- Generate more two digit examples if students additional more practice.

Guided Practice (10 minutes)

- Now provide a three-digit example with the number 156 in the larger circle and 45 in the smaller circle. Have students do this three-digit example with a partner if they are unsure. Share and discuss reasoning and strategies as a class, noting that the same strategies can be applied as were used with simpler
