Paths between Peace and Public Service Jürgen René Blum, Marcos Ferreiro-Rodríguez, Vivek Srivastava, 2018-12-28 Building a capable public service is fundamental to postconflict state building Yet in postconflict settings short term pressures often conflict with this longer term objective To ensure peace and stabilize fragile coalitions the imperative for political elites to hand out public jobs and better pay to constituents dominates merit Donor financed projects that rely on technical assistants and parallel structures rather than on government systems are often the primary vehicle for meeting pressing service delivery needs What then is a workable approach to rebuilding public services postconflict Paths between Peace and Public Service seeks to answer this question by comparing public service reform trajectories in five countries Afghanistan Liberia Sierra Leone South Sudan and Timor Leste in the aftermath of conflict The study seeks to explain these countries different trajectories through process tracing and structured focused methods of comparative analysis To reconstruct reform trajectories the report draws on more than 200 interviews conducted with government officials and other stakeholders as well as administrative data The study analyzes how reform trajectories are influenced by elite bargains and highlights their path dependency shaped by preconflict legacies and the specifics of the conflict period As the first systematic study on postconflict public service reforms it identifies lessons for the future engagement of development partners in building public services Rebuilding the bureaucracy is possibly the most underappreciated policy and research question in fragile states today This is one of the most politically astute and thoughtful books I ve read on postconflict policy making of any kind Christopher Blattman Ramalee E Pearson Professor of Global Conflict Studies Pearson Institute for the Study and Resolution of Global Conflicts Harris Public Policy University of Chicago Rebuilding states after conflict is the greatest challenge in development today And yet we know precious little about the actual experience of countries that have tried to rebuild their civil service and restore public services This is a monumental study based on extensive empirical data and field based research across multiple cases that actually opens up the black box of state building in conflict affected countries It should be required reading for anyone who takes on this extraordinary challenge Joel S Hellman Dean Edmund A Walsh School of Foreign Service Georgetown University There isn t a more pressing problem in international development than formulating practical strategies for building institutions in fragile states This book is a remarkable distillation of the frontline experiences of the World Bank in tackling this task Finally we have the basis for an empirically grounded assessment of what works and why Unputdownable James Robinson Reverend Dr Richard L Pearson Professor of Global Conflict and University Professor Institute Director Pearson Institute for the Study and Resolution of Global Conflicts Harris Public Policy University of Chicago
