Figure 7. Scatter plot showing the relationship between the number of days spent in hospital and the number of days spent in nursing home. The correlation coefficient is 0.89, indicating a strong positive correlation. The regression equation is $y = 0.89x + 0.1$, where y is the number of days in nursing home and x is the number of days in hospital. The data points are clustered around the regression line, suggesting a good fit.

These two equations define the *addition* of two operators as well as the *multiplication* of two operators – a useful mathematical device to formalise the relationship between two operators. The second equation is *commutative* – a change in the order of the operators does not change the product – as you might expect from classical physics. The first, however, is *non-commutative*, which means that the order of the operators matters. Substituting the first equation for \hat{p} into the second equation gives the *Heisenberg uncertainty relation* (see below).

The Burning Answer Keith Barnham, 2015-05-15 Our society faces a choice We could be enjoying a sustainable lifestyle but we have chosen not to In three generations we have consumed half the oil produced by photosynthesis over eight million generations In two generations we have used half our uranium resources With threats from global warming oil depletion and nuclear disaster we are running out of options Solar power as Keith Barnham says is our necessary solution Barnham explains that the roots of solar energy lie in a little known equation $E = hf$ an equation which was coincidentally celebrated and explained to the world by Einstein in the same year he discovered $E = mc^2$ He alleges that the former equation has been overlooked in favor of the latter much to our detriment and Barnham is here to offer us a solution We can still turn things around and solar energy is the key In this provocative inspiring passionately argued book Keith Barnham outlines actions that any one and all of us can take to make an impact now and on future generations *The Burning Answer* is a solar manifesto for the new climate aware generation and a must read for climate change skeptics [Resources in Education](#), 1997

First Law of Physics, Let There Be Light Miles Pelton, 2013-12-06 Rather than recognize a divine almighty powerful creator the scholars studying and teaching the behavior of the universe adopted and followed a theory that the universe and everything in it is self perpetuating negating the need for a source of energy While instilling a very anticreation mind set those beliefs have set the community of physicists off chasing hypotheses trying to prove the flawed archaic conservation of energy theory After a lifelong career in engineering frustrated with illogical theories and meaningless explanations of physics the author has set out to challenge physicists to open their eyes and minds to the fundamental principles that are being hidden by an anticreation mind set and by so doing open the door to understanding scientific and religious mysteries right here on earth *Concentration by Competing Raw Fuel Industries in the Energy Market and Its Impact on Small Business* United States. The Answer to Nearly Everything Peter Franklin, 2012-02 The only information we have on Atlantis is from a very ancient Egyptian account that describes it as bigger than all their neighbours combined Why is this fact ignored by most of the fanciful theories From Atlantis to our current scientific predictions the truth about so many things becomes clear and obvious only if all the facts are collected and examined yet many people just select those that agree with their thinking The resulting conflict between experience and belief truth and distortion or good and bad is only resolved when science philosophy and theology are harmonized and examined as aspects of one universal truth
