Christology and Global Ethics Martins, Alexandre A.,2023 This book offers a Christological account developed among the poor in Latin America and their experience of a God incarnated in history It places two realities together the academia where faith is object of studies and the grassroots community where faith is embodied The author introduces the reader to a contemporary Christological discussion from a Latin American liberating perspective with three essential characteristics first it is a Christology created from the reality of the poor and marginalized and at the same time oriented toward this reality as a pastoral resource Second its method goes beyond the polarization Christology from below and Christology from above Third it is a Christological essay that has a biblical text at its center Lk 4 16 30 as a starting point from where important theological disciplines are stressed such as systematic theology moral theology and liturgy In this way this book presents to the readers how different areas of theology are related and form a unity around the mystery of Christ and the faith experience of a Christian community Therefore it is an excellent book to initiate people in theological studies and method that can be used in theological classes in colleges schools and Catholic communities

Psychopathology in Women Margarita

Sáenz-Herrero,2014-10-14 Gender has a fundamental influence on the human brain not only by virtue of biological and hormonal differences between the sexes but also because of the impact of gender specific cultural social anthropological and environmental factors Nevertheless the relation of gender and psychopathology remains a largely neglected field Gender perspective has been treated as a paradigm in this book on psychopathology because it determines the way in which a psychiatric symptom is defined perceived and understood This conception of gender as being of key importance in the definition of psychiatric symptomatology is exceptional in the literature The book opens by examining historical and cultural aspects of mental health in women worldwide and the relation of sex brain and gender with coverage of both neurobiological and psychosocial aspects The significance of gender with regard to specific aspects of psychopathology is then addressed in detail A wide range of psychological disorders are considered as well as hormonal influences and issues concerning body image self identity sexuality and life instinct It is hoped that this book will make a significant contribution in ensuring that gender perspective receives due attention within descriptive psychopathology

A Theory of Legal Sentences
Manuel Atienza, J. Ruiz Manero, 1997-11-30 Legal statements are according to the authors the most basic elements of the law Nevertheless they must be considered not only as the pieces of a puzzle but also as the components of a dynamic and highly complex reality the law of contemporary society The book presents an analysis of the different types of legal statements mandatory rules principles power conferring rules definitions permissions values and the rule of recognition from a threefold perspective that is considering their logical structure their function in legal reasoning as reasons for action and their connections with the interests and power relationships among the individuals and the social groups The result is conceived as a first step in the building of a general theory of law designed not as an isolated discourse but as a decisive element for the dynamization of the legal culture
