Laboratory 2. Measurement of Density

Comments to the Instructor

This laboratory is much like Laboratory 1 in that its purpose is to introduce the concepts of measurement. This laboratory introduces the students to the vernier caliper and to the laboratory balance. Because there are usually more laboratories to do in a semester than time permits, it may be necessary to choose between Laboratory 1 and Laboratory 2 or else do both of them in one period.

It is important to note that the metal cylinders should not be perfectly machined or the variations in the measurements of length and diameter when using the vernier caliper will be so small that the point to the laboratory may be lost.

In addition to the general ideas about the measurement process contained in this laboratory, the concept of density is introduced. The student is asked to compare his results with the known density of the material from which the cylinder is made. There is enough variation in the density of a given type of metal that the instructor really should make an
