## Ministry Expectation

- Expectations: A1

## Learning Goal

1. Distinguish mathematical relationships as function, or relation by discussing their domain and range.
2. Interpret and represent functions using equations written in function notation, tables, diagrams and graphs and connect them to applications.
3. Develop efficient techniques for graphing the functions (quadratic, square root, reciprocal and absolute\* functions) including transformations (translation, compression/stretch and reflection).
4. Understand the relationship between an inverse and its original function including its domain and range and find it from various representations.
5. Leverage the composition\* of functions to accomplish multiple steps within a larger process.

## Success Criteria

- Determine if a mathematical relationship is a function or relation from various representations and explain why it is one or the other?
- Apply connections between various representations of functions (mapping diagrams, tables, graphs, and equations expressed using function notations) to solve problems including: evaluating for y; solving for x; and finding the equation of the function?
- Predict the transformations of a parent function (quadratic, square root, reciprocal, and absolute\*) and graph the function accurately and efficiently?
- Determine and apply the inverse of a function as an "undo" or "reverse" of the original function?
- Describe the relationship between the domain and range of an inverse and its original function?

$$y = af[b(x - h)] + k$$

$$(x, y) \rightarrow \left( \frac{1}{b}x + h, ay + k \right)$$
