2 What are the key types of capital markets?

Question: Differentiate between primary and secondary capital markets.

Answer: Primary Market: Where new securities are issued and sold to investors for the first time (e.g., IPOs, Initial Public Offerings). Secondary Market: Where existing securities are traded among investors such as on stock exchanges like NYSE or NASDAQ.

4 What is the role of a stock exchange?

Answer: A stock exchange is a platform for buying and selling securities. It ensures transparency, liquidity, price discovery, and protection for investors through regulatory frameworks.

5 Explain the difference between equity financing and debt financing.

Answer: Equity Financing: Raising capital by selling ownership stakes in the form of shares. No repayment obligation but dilutes ownership. Debt Financing: Borrowing money through loans or bonds. Must be repaid with interest but retains ownership.

6 What is an IPO and how does it work?

Answer: An Initial Public Offering (IPO) is when a private company sells its shares to the public for the first time to raise capital. The process involves underwriting, regulatory approvals, pricing, and listing the shares on a stock exchange.

Answer: Derivatives are financial instruments whose value is derived from an underlying asset (e.g., stocks, commodities, or currencies). They are used for hedging, speculation, and arbitrage.

8 How do interest rates impact the capital markets?

Answer: Interest rates significantly influence capital markets. Higher rates typically reduce stock prices as borrowing costs increase and bond yields become more attractive. Conversely, lower rates encourage investment and higher equity valuations.

9 What are the key financial ratios investors consider in capital markets?

Answer: P/E Ratio: Price to Earnings. Measures stock valuation. Debt to Equity Ratio: Indicates financial leverage. ROE: Return on Equity. Shows profitability relative to equity. Current Ratio: Measures liquidity.
