

TECHNIQUES OF NARRATIVE THERAPY

1

PUTTING TOGETHER THE NARRATIVE

Allows the client to express their thoughts and explore events in their lives and the meanings they have placed on these experiences.

2

EXTERNALIZING THE PROBLEM

Leading clients towards viewing their problems or behaviors as external instead of an unchangeable part of themselves - they realize they themselves are not the problem.

3

DECONSTRUCTION

Working with the client to break down or deconstruct their stories into smaller, more manageable parts to clarify the problem.

4

UNIQUE OUTCOMES

This refers to the exceptions to the dominant story. Also known as 're-authoring' or 're-storying,' clients go through their experiences to find alterations to their story or make a whole new one.

book makes a unique contribution to the philosophy and psychiatry literature in examining both the philosophical bases of discursive therapy whilst also showing how discursive perspectives can be applied in real therapeutic situations The book will be of great value and interest to psychotherapists and psychiatrists wishing to understand explore and apply these innovative techniques
