students on teacher training courses

INVESTIGATING COMPARABILITY OF WRITING TASKS WITH PICTURE

PROMPTS IN AN IN-HOUSE ENGLISH PROFICIENCY TEST YALI SHI, 2022-04-28 For security reasons using parallel writing tasks within or across different test administrations is common practice in large scale language testing. Lack of task comparability would result in unjustified variance in test performance and consequently jeopardize test validity and fairness. Thus it is crucial for test developers to gather empirical evidence from different aspects to substantiate the fairness argument that scores are consistent and score based decisions are impartial across parallel tasks. Despite many studies hitherto on writing task comparability those addressing picture prompt writing tasks in an integrated manner have remained quite underexplored. Therefore this book investigates the comparability of five writing tasks with picture prompts randomly assigned across testing occasions in an in house English proficiency test EPT of a comprehensive university from three perspectives: the scores, the texts and the raters and test takers. Results show that task difficulty is not comparable either in terms of some lexical syntactic and content features elicited or as judged by raters and test takers which could be related with topic familiarity and conceptual clarity of the picture prompt. Yet overall task comparability is achieved in not only final scores but also score distribution and classification accuracy. The findings support the fairness argument for EPT writing and provide theoretical practical and methodological implications. The Fluency Construct Kelli D. Cummings, Yaacov

Petscher, 2015-12-11 This book provides a comprehensive overview of fluency as a construct and its assessment in the context of curriculum based measurement CBM. Comparing perspectives from language acquisition reading and mathematics the book parses the vagueness and complexities surrounding fluency concepts and their resulting impact on testing intervention and students educational development. Applications of this knowledge in screening and testing ideas for creating more targeted measures and advanced methods for studying fluency data demonstrate the overall salience of fluency within CBM. Throughout contributors argue for greater specificity and nuance in isolating skills to be measured and improved and for terminology that reflects those educational benchmarks. Included in the coverage: Indicators of fluent writing in beginning writers; Fluency in language acquisition reading and mathematics; Foundations of fluency based assessments in behavioral and psychometric paradigms; Using response time and accuracy data to inform the measurement of fluency; Using individual growth curves to model reading fluency; Latent class analysis for reading fluency research. The Fluency Construct: Curriculum Based Measurement Concepts and Applications is an essential resource for researchers graduate students and professionals in clinical child and school psychology language and literature applied linguistics special education neuropsychology and social work.
