Power and Influence after the Cold War Ann L. Phillips, 2000-05-30 Challenging conventional wisdom about German dominance in the new Europe this study presents a new approach to the question of power and influence after the Cold War Inspired by the debate over

German hegemony and drawing on intensive fieldwork Ann L Phillips develops two original cases of German relations with East Central Europe to test competing arguments As she convincingly demonstrates the politics of reconciliation and the activities of German party affiliated foundations illustrate German engagement in the region in its dual faces restraint and projection The author uses the less developed literature on reciprocal influences of domestic politics and the international environment to frame her analysis These two cases provide evidence not only of the intersection of domestic politics and international relations but of when and how one trumps the other Contributing to the theoretical debate Phillips argues that this interplay explains the divergent trajectories bilateral relations have taken since 1990 in ways that more traditional neo realist or liberal approaches could not The author s fresh perspective and new evidence demonstrate that East Central European states play a much greater role in the influence equation than they did in the past

International Relations **Rogue States and U.S. Foreign Policy** Robert Litwak,2000-02-14 President Clinton and other U S officials have warned that rogue states pose a major threat to international peace in the post Cold War era But what exactly is a rogue state Does the concept foster a sound approach to foreign policy or is it in the end no more than a counterproductive political epithet Robert Litwak traces the origins and development of rogue state policy and then assesses its efficacy through detailed case studies of Iraq Iran and North Korea He shows that the policy is politically selective inhibits the ability of U S policymakers to adapt to changed conditions and has been rejected by the United States major allies Litwak concludes that by lumping and demonizing a disparate group of countries the rogue state approach obscures understanding and distorts policymaking In place of a generic and constricting strategy he argues for the development of differentiated strategies of containment tailored to the particular circumstances within individual states **A Concise History of U.S.**

More "lost Peace"? Raffaele D'Agata, Lawrence Gray,2011 Were there any missed chances to build a more peaceful world than the present one after the Cold War Were there any attempts at working out a more comprehensive and more cooperative way to overcome it What was precisely at stake during the Cold War What was really at stake for the losers and what stakes did the winners gain if there are any winners at all Those questions were raised during a seminar where some outstanding scholars were invited to discuss them plainly before an audience of young students in an ancient yet peripheral Italian university The result may be seen as a readable concentration of basic and meaningful insights that often defy a noticeable amount of conventional wisdom on the ground of careful and authoritative scholarly research **Germany and**

the past years It draws on a unique data set that consists of extensive biographical data of 30 cabinet members and other senior foreign policy officials of each of the past three administrations of Clinton G W Bush and Obama This book is of great use to specialists in International Relations within International Political Economy International Security and Foreign Policy Analysis as well as students of US Politics US Foreign Policy After the Cold War Fraser Cameron,2006-03-20 Since the success of the best selling first edition the world has remained fascinated with US foreign policy not least because of the far reaching consequences of the US led invasion of Iraq This fully updated textbook follows the events of the past two and a half years including the 2004 presidential campaign whilst still providing a comprehensive introduction to all aspects of American foreign policy Chapter headings include from colony to superpower the post Cold War decade the role of Congress the media and public opinion the US and terrorism Examining the administrations of George Bush Bill Clinton and George W Bush it explains the complex interaction between the institutions of power the key actors and the non governmental organizations to give a complete picture of foreign policy With a complete glossary of terms this textbook is ideal for those studying American politics or international relations Companion website available at www.routledge.com/textbooks/0415358655 *Shaping American Military Capabilities after the Cold War* Richard Lacquement,2003-02-28 For more than 40 years U S defense policy and the design of military capabilities were driven by the threat to national security posed by the Soviet Union and its allies As the Soviet Union collapsed analysts wondered what effect this dramatic change would have upon defense policy and the military capabilities designed to support it Strangely enough this development would ultimately have little effect on our defense policy Over a decade later American forces are a smaller but similar version of their Cold War predecessors The author argues that despite many suggestions for significant change the bureaucratic inertia of comfortable military elites has dominated the defense policy debate and preserved the status quo with only minor exceptions This inertia raises the danger that American military capabilities will be inadequate for future warfare in the information age In addition such legacy forces are inefficient and inappropriately designed for the demands of frequent and important antiterrorist and peace operations Lacquement offers extensive analysis concerning the defense policymaking process from 1989 to 2001 including in particular the 2001 Quadrennial Defense Review This important study also provides a set of targeted policy recommendations that can help solve the identified problems in preparing for future wars and in better training for peace operations
