

Lab 7 Activity: Waves

In this laboratory you will learn about wave characteristics, including the propagation of a wave, and will learn how waves are the carriers of the information about the object that **has created the wave**.

Exercise 1: Wave Characteristics

Waves are disturbances traveling through mediums (or propagating) and the medium are generally **oscillating** (moving) that carries the disturbance through space (i.e. oscillating) or in the **y** direction while disturbance travels along in the **x** direction (bobs and oscillates) and **propagation** takes in this first activity we will explore the characteristics of a wave, including disturbance (up and down).

In wave, we find **crest**, **trough**, **amplitude**, **period** **wavelength** and some wave has the graph on top character (period) on the **x** axis, and the **y** axis shows the **disturbance** (oscillation) (up and down) (oscillation) (up and down).
