For the ITRR-501

The silver screw on the back of the turntable is a balancer for both the turntable as well as for the tone arm. Turn this screw with a coin to either left or right and test by moving your tone arm to the middle of the spindle. Please note that this screw is a balancer and will have to be adjusted until the tone arm moves freely to the end of the record (middle of the spindle) without any resistance.

AUTO TRACKING function is to cut the separation for each music/song you are recording to the CD by recognizing the silence that is in between the songs on your records or cassette tapes. The decibels (lowest 20-30-40 highest) allows you to chose the level of minimal sound that may still exist between the songs to be recognized as the separation before the next song to cut a track. If your source of the recording quality is not of best quality it is recommended to use the "MANUAL TRACKING" function for the best result in recording.

Please use this function to record from other sources such as CD, karaoke machines and radio. We also recommend using this function to make the cassette tape to CD recording much easier. Use the included AUX cable and connect one end to the AUX jack on the front.
