Jotterand, Clara Bosco, 2025-04-21 This book offers an examination of the importance of humanism in surgical education and
practice As technology is increasingly dictating the way of being and doing in medicine there is an urgent need to re consider
what medical humanism can offer to sustain the professional identity of surgeons and contribute to the training of future
surgeons Bioethics usually considered as major source for the professional identity of surgeons is ill suited for such a task as
it has produced a process of moral reasoning that is less interested in questions of personal and professional identity and
more devoted to principles of obligation concerning right actions and pragmatic considerations that optimize outcomes
Fostering Humanism in Surgical Practice provides an intellectually robust medical ethics beyond bioethics and a vision of
medicine qua surgery medical professionalism and medical humanism re oriented toward the promotion of character
development compassionate care and human flourishing for both patients and surgeons This volume will be targeted at a
wide scholarly audience including researchers from medicine philosophy of medicine the humanities philosophy of
technology medical anthropology information robotics medical engineering law and others This text can be used in
introductory or advanced courses in the philosophy of medicine science and technology studies and philosophy of technology
