Economic and Social Perspectives on European Migration Francesca Fauri,Debora Mantovani,Donatella Strangio,2020-12-28 This book addresses a wide range of migration related issues in the European context and examines the socioeconomic consequences of migratory flows throughout Europe focusing on a number of emblematic European countries

The book is divided into three parts. The first part deals with the tension between migrants and their integration processes in the receiving country, which is deeply influenced by the attitude of the local population and the different approach to highly and less skilled immigrants. The second part analyses the impact of migration on the economic structure of the receiving country, while the third part explores the varying degree of immigrants' socioeconomic integration in the country of destination. The book offers an essential interdisciplinary contribution to the issue of migration and provides readers with a better understanding of the effects that different forms of migration have had and will continue to exert on economic and social change in host countries. It also examines migration policy issues and builds on historical and empirical case studies with policy recommendations on labour market integration and welfare policy issues. The book is addressed to a wide audience including researchers, academics, and students of economics, sociology, politics, and history, as well as government and EU officials working on migration topics.

China's Quest for Great Power Bernard D Cole, 2016-09-15. This book examines China's national security strategy by looking at the three major elements: foreign policy, energy security, and naval power. All interactive and major influences on China's future and its relations with the United States. A decade and a half into the twenty-first century, Beijing requires reliable access to energy resources; the navy to defend that access; and foreign policies to navigate safely toward its goals. Most importantly, the People's Liberation Army Navy (PLAN) must be able to safeguard China's regional maritime interests, especially the sovereignty disputes involving Taiwan and the Yellow Sea, East China Sea, and South China Seas. Many Chinese naval officers and analysts think the United States is determined to contain China and prevent it from achieving the dominant historical position to which it is entitled. This view

has been strengthened by Washington's shift to Asia transfer of naval units to the Pacific and the March 2015 Maritime Strategy released by the U S Navy Marine Corps and Coast Guard China's relationship with the United States is vital to both countries and to the world The relationship is based on both common and divergent interests in economics military operations and political goals and methods China's international trading economy and ambition for a world class navy require effective foreign diplomacy and participation in global affairs This policy trifecta in large part defines China's posture to the world Beijing is approximately halfway toward its mid century goal of deploying a navy capable of defending China's perceived maritime interests China's priorities follow President Xi Jinping's definition of national security as comprehensive encompassing politics the military the economy technology the environment and culture What this means for future Chinese foreign policy choices as naval modernization and energy security concerns enable different courses of action lies at the center of this book's conclusions International Resource Politics in the Asia-Pacific Jeffrey David Wilson, 2017-06-30
