Reflections on English Word-Formation Laurie Bauer,2025-08-31 We are all familiar with coming across a new word whether it has just been invented or whether we have just not met it before How do we invent new words How do we understand words that we have never heard before What are the limits on the kinds of words we produce How have linguists and grammarians dealt with the phenomenon of creating new words and how justified are their ways of viewing such words In this concise and compelling book Professor Bauer one of the world s best known morphologists looks back over fifty years of his work seeking out overlooked patterns in word formation and offering new solutions to recurrent problems Each section deals with a different morphological problem meaning that the book can either be read from start to finish or alternatively used as a concise reference work on the key issues and problems in the field

Morphological Productivity Laurie Bauer,2001-05-28 Why are there more English words ending in ness than ending in ity What is it about some endings that makes them more widely usable than others Can we measure the differences in the facility with which the various affixes are used Does the difference in facility reflect a difference in the way we treat words containing these affixes in the brain These are the questions examined in this book Morphological productivity has over the centuries been a major factor in providing the huge vocabulary of English and remains one of the most contested areas in the study of word formation and structure This book takes an eclectic approach to the topic applying the findings for morphology to syntax and phonology Bringing together the results of twenty years work in the field it provides new insights and considers a wide range of linguistic and psycholinguistic evidence

 pattern in English the formation of nouns by suffixation with ee Rather than relying on a single semantic or syntactic
 framework for analysis the study combines diachronic cognitive and language contact perspectives in order to explain the
 diversity in the formation and establishment of ee words It also seeks to challenge previous measurements of productivity
 and proposes a new way to investigate the relationship between actual and possible words By making use of the largest and

Creative Compounding in English Réka Benczes, 2006-01-01 Metaphorical and metonymical compounds novel and lexicalised ones alike are remarkably abundant in language Yet how can we be sure that when using an expression such as land fishing in order to speak about metal detecting the referent will be immediately understood even if the hearer had not been previously familiar with the compound Accordingly this book sets out to explore whether the semantics of metaphorical and metonymical noun noun combinations can be systematically analysed within a theoretical framework where systematicity pertains to regularities in both the cognitive processes and the products of these processes that is the compounds themselves Backed up by recent psycholinguistic evidence the book convincingly demonstrates that such compounds are not semantically opaque as it has been formerly claimed they can in fact be analysed and accounted for within a cognitive linguistic framework by the combined application of metaphor metonymy blending profile determinacy and schema theory and represent the creative and associative word formation processes that we regularly apply in everyday language

Bibliography of Morphology, 1960–1985, 1988-01-01 Rather than an attempt at an exhaustive bibliography of

morphology this is a collection of major and selected minor works of theoretical interest in the broadest sense The area of morphology represented here exhaustively is contemporary generative theoretical morphology interpreted broadly enough to include theoretically interesting structuralist works works aimed at explaining deep motivations of morphology or pertinent to contemporary theoretical morphology Selected descriptive works have been included as well it is not at all simple to draw a line between descriptive works of theoretical interest and fundamentally theoretical works and in addition we hope to provide entry points into a variety languages for morphologists seeking language specific evidence for general hypotheses

Competition in Word-Formation Alexandra Bagasheva,Akiko Nagano,Vincent Renner,2024-05-15 This volume focuses on a number of interrelated issues in the theorizing and interpretation of morphological rivalry including the differences between a semasiological and an onomasiological approach to competition phenomena in word formation the scope of such phenomena micro level rivalry between individual affixes as well as macro level competition between different processes the different sources of competition and the possible resolutions of competitive situations An overview of existing research in the field is provided as well as new cutting edge findings and proposals for analytical innovation Linguistic data are drawn from European and Asian languages and morphologists semanticists and anyone interested in the dynamics of language will be stimulated by the analytical models and explanations offered in the 11 chapters
