Holt Lifetime Health Reproduction:

Reproductive Sciences in Animal Conservation Pierre Comizzoli, Janine L. Brown, William V. Holt, 2019-08-30 This second edition emphasizes the environmental impact on reproduction with updated chapters throughout as well as complete new chapters on species such as sharks and rays This is a wide ranging book that will be of relevance to anyone involved in species conservation and provides critical perspectives on the real utility of current and emerging reproductive sciences Understanding reproductive biology is centrally important to the way many of the world's conservation problems should be tackled Currently the extinction problem is huge with up to 30% of the world's fauna being expected to disappear in the next 50 years Nevertheless it has been estimated that the global population of animals in zoos encompasses 12 000 15 000 species and we anticipate that every effort will be made to preserve these species for as long as possible minimizing inbreeding effects and providing the best welfare standards available Even if the reproductive biology community cannot solve the global biodiversity crisis for all wild species we should do our best to maintain important captive populations Reproductive biology in this context is much more than the development of techniques for helping with too little or too much breeding While some of the relevant techniques are useful for individual species that society might target for a variety of reasons whether nationalistic cultural or practical technical developments have to be backed up by thorough biological understanding of the background behind the problems

Reproductive Science and Integrated Conservation W. V. Holt, 2003 Reproduction is essential to the continuation and evolution of life on this planet and is therefore a centrally important process in the conservation of wildlife However reproductive mechanisms are well understood in only a handful of vertebrate species mostly domestic livestock and laboratory animals This means that attempts to develop and implement management policies for wildlife conservation and especially for endangered species that by definition are difficult to study are often based on poor data or no data at all In Reproductive Science and Integrated Conservation leading authorities provide glimpses of reproductive diversity in fishes amphibia reptiles birds and mammals Conservation plans are founded on the assumption that reproduction will be successful but what if it fails This book reviews the many factors that influence reproduction including genetics behaviour and nutrition and experts assess the potential conservation relevance of the recent rapid advances in reproductive technology and medicine

Social Inequalities in Health in Nonhuman Primates Carol A. Shively, Mark E. Wilson, 2016-04-20 This book provides a comprehensive look at nonhuman primate social inequalities as models for health differences associated with socioeconomic

status in humans The benefit of the socially housed monkey model is that it provides the complexity of hierarchical structure and rank affiliation i e both negative and positive aspects of social status At the same time nonhuman primates are more amenable to controlled experiments and more invasive studies that can be used in human beings to examine the effects of low status on brain development neuroendocrine function immunity and eating behavior Because all of these biological and behavioral substrates form the underpinnings of human illness and are likely shared among primates the nonhuman primate model can significantly advance our understanding of the best interventions in humans *Nutrition During the First 1000 Days and Fetal Programming* Guadalupe Estrada-Gutierrez,Otilia Perichart-Perera,Felipe Vadillo-Ortega,2022-08-16

Reproductive Sciences in Animal Conservation William V. Holt,Janine L. Brown,Pierre Comizzoli,2014-08-04 Reproductive biology is more than the development of techniques for helping with too little or too much breeding While some of the relevant techniques are useful for individual species technical developments have to be backed up by thorough biological understanding of the background behind the problems This book is therefore threefold 1 it provides a snapshot of the state of the art in terms of species specific reproductive technologies whether for individual animals or whole taxonomic groups 2 it sets the reproductive problems in context and emphasizes the links between animal based problems and the wider world e g reproductive fitness and 3 it looks forward and presents realistic assessments of how effective some of the more recently developed techniques in reproductive technology might be at combating extinctions This is a wide ranging book that will be relevant to anyone involved in reproductive biology or in species conservation and provides provide them some useful perspectives about the real utility of current and emerging technologies It has contributions from experts in reproduction and related fields **A Lifetime of Health** Holt Rinehart & Winston,Holt, Rinehart and Winston Staff,2004

conserved across vertebrates including humans and GnIH is involved in a number of physiological and behavioral functions related to reproduction The aim of this e book is to celebrate the discovery of GnIH and the progress of GnIH research by collecting review and original articles from leading scientists in this new research field **Reproductive Justice** Joan C. Chrisler,2012-02-13 Every woman in the world has the right to control her own body plan her family receive good quality medical care and give birth to a healthy baby This book takes a comprehensive look at the status of women s reproductive rights from a transnational human rights perspective Reproductive justice is a relatively new term that underscores the fact that the existence of reproductive rights does not mean that women are able to exercise those rights For women unable to exercise their rights for any number of reasons a lack of available services where they live lack of money or health insurance to pay for services being forbidden by family members to seek services the reality is they have no choices to make and possess little if any control over their own bodies regardless of what the government states their rights are Reproductive Justice A Global Concern provides a comprehensive and integrated examination of the status of reproductive rights for the world s women covering a wide range of reproductive rights issues Topics include women s rights to determine their own sexuality and choose their own partners rape sex trafficking fertility treatments and other assisted reproductive technologies contraception and abortion maternal and infant mortality postpartum support and breastfeeding **Social Sciences for Healthcare Professionals** Chris Allen,2025-08-25 A comprehensive guide to social sciences in person centred healthcare practice To deliver truly person centred care healthcare professionals must understand the complex social psychological and economic factors that influence health and wellbeing Social Sciences for Healthcare Professionals bridges the gap between theory and practice providing a thorough overview of essential social science concepts and their relevance in clinical settings Covering a wide range of core topics from understanding social determinants of health to promoting equitable care Dr Chris Allen and his team provide readers with evidence based insights to drive better outcomes for individuals and communities Social Sciences for Healthcare Professionals Combines insights from disciplines including psychology sociology and economics for a multidisciplinary approach to healthcare Features practical case studies to illustrate theory and its application in diverse clinical settings Promotes critical thinking and reflective practices for improved healthcare delivery Includes activities and recommendations to support learning in both academic and professional contexts Emphasises the importance of evidence based socially sensitive healthcare Written by experienced educators and experts in nursing education Social Sciences for Healthcare Professionals is essential reading for pre registration undergraduate and postgraduate healthcare students in nursing midwifery and allied health fields It is designed to support both coursework and professional practice aligning with degree programmes in healthcare and allied health sciences **Ethnic Differences in Fertility and Assisted Reproduction** Fady I. Sharara,2013-07-17 Over the past 10 years studies have shown that the rates of fertility vary in different ethnic groups Ethnic differences also play a significant role in the outcome of assisted

reproductive technology ART cycles In the United States minority groups African Americans Hispanics mainly Mexicans and Central Americans East Asians Chinese Japanese Koreans Philipinos and South Asians Indians Pakistanis and Bengalis have significantly lower chances of live births compared to Caucasian women Birth outcome data collected by the Society for Assisted Reproductive Technology shows a worsening trend in conception rates between the years 1999 2000 and 2004 2006 raising more concern that the disparity in fertility rates between minority groups and white women is widening over time This comprehensive book serves to answer the questions that arise when managing infertility in a multi ethnic population An expert assembly of key leaders in the field of reproductive medicine imparts insight and clinical experience in order to identify and analyze the possible causes of racial disparities in fertility outcome Some of the reviewed causes include higher Body Mass Index BMI tubal diseases metabolic syndrome and fibroids in African Americans tubal disease and higher early pregnancy loss in Hispanics higher incidence of diminished ovarian reserve and lower BMI in East Asians and higher incidence of polycystic ovarian disease PCOS in South Asians The book also provides a review of data on access to care and ART services in developing countries A thoughtful combination of evidence based medicine and advanced treatment options this book is sure to distinguish itself as the definitive reference on ethnic differences in assisted reproduction
