Under the Shadow of Nationalism Mariko Asano Tamanoi, 1998-03-01 The contribution of rural women to the creation and expansion of the Japanese nation state is undeniable As early as the nineteenth century the women of central Japan s Nagano prefecture in particular provided abundant and cheap labor for a number of industries most notably the silk spinning industry Rural women from Nagano could also be found working from a very young age as nursemaids domestic servants and farm laborers In whatever capacity they worked these women became the objects of scrutiny and reform in a variety of nationalist discourses not only because of the importance of their labor to the nation but also because of their gender and domicile the countryside was the centerpiece of state ideology and practice before and during the war during the Occupation and beyond Under the Shadow of Nationalism explores the interconnectedness of nationalism and gender in the context of modern Japan It combines the author s long term field research with a painstaking examination of the documents behind these discourses produced at various levels of society from the national government records social reformers reports ethnographic data to the local teachers manuals labor activists accounts village newspapers It provides a wide ranging yet in depth look at a key group of Japanese women as national subjects through the critical chapters of Japanese modernity and postmodernity

Commercialization of Microbial Pest Control Products for Control of Arthropods Willem J. Ravensberg, 2011-02-09

Biocontrol is among the most promising methods for a safe environmentally benign and sustainable pest control. Microbial pesticides offer a great potential and it is anticipated that they will become a substantial part of the use of all crop protection products. Their development and commercialization, however, has been difficult and with many failures. In this book, a rational and structured roadmap has been designed for the development and commercialization of microbial pest control products for the control of arthropod pests. The building blocks of the entire process are identified and essential aspects highlighted. Biopesticides based on entomopathogenic bacteria, fungi, viruses, and nematodes are elaborately discussed. This systematic roadmap with a strong focus on economics and market introduction will assist academic researchers and industrial developers of biopesticides in accomplishing their goal: the development of successful, cost-effective microbial pesticides.

Rhetoric in Modern Japan Massimiliano Tomasi, 2004-07-31. *Rhetoric in Modern Japan* is the first volume to discuss the role of Western rhetoric in the creation of a modern Japanese oral and narrative style. It considers the introduction of Western rhetoric, clarifying its interactions with the forces and synergies that shaped Japanese literature and culture in the late nineteenth and early twentieth centuries. Focusing on the Meiji and Taisho years 1868-1926, it challenges the prevailing view among contemporary scholars that rhetoric did not play a significant role in the literary developments of the period. Massimiliano Tomasi chronicles the blooming of scholarship in the field in the early 1870s, providing the first descriptive analysis and cogently articulated critique of the major rhetorical treatises of the time. In discussing the rise of public speaking in early Meiji society, he unveils the existence of crucial links between the study of rhetoric and the social and literary events of the time, underscoring the key role played by oratory both as a tool for social modernization and as an effective platform for the reappraisal of the spoken language. The collusion and conflicts characterizing rhetoric and its relationship with the genbun itchi movement, which sought to unify spoken and written language, are explored, demonstrating that their perceived antagonism was the product of a misguided notion of rhetoric and the process of rhetorical signification rather than a true theoretical conflict. Tomasi makes a convincing argument that, in fact, Western rhetoric mediated between these equally compelling pursuits and paved the way toward an acceptable compromise between classical and colloquial written styles.
