Current Status and New Developments T. Theophanides, Jane Anastassopoulou, 2012-12-06 This book presents the lectures and posters of some of the main leaders in the field of the magnesium research and medical applications delivered at the 8 International Symposium on Magnesium which took place on 5-9 October 1997 in Heraklion Crete under the chairmanship of Professor Theophilos Theophanides. The meeting was sponsored by the National Technical University of Athens and Ministry of Industry, Energy and Technology. The aim of this meeting was to promote research and applications of magnesium and interface between medical doctors, clinicians and scientists in order to understand the mechanisms responsible for magnesium involvement in the pathogenesis of diseases, its biological significance, metabolism and many other utilizations which are associated with membranes and cells. The success of this interface is due to the contribution of its participants who came from all continents and to their high scientific level. The topics which were presented and the questions which were asked concerned mechanisms of mode of action of free magnesium cations Mg^{2+} , hydrated cations $Mg^{2+} \cdot 6H_2O$ and magnesium linked cations $Mg-L_xH_0$ where L ligand and $x = 2, 1, 6$ H_2O . We would like to express our utmost gratitude to the sponsors and to extend our deep appreciation and thanks to all those who helped and encouraged the scientific and material organization of this meeting. We wish to thank all the members of the scientific committee and the organizing committee.

Healing by Hand Servando Z. Hinojosa, Kathryn S. Oths, 2004-10-17 Anthropologists have routinely overlooked the practice of body therapists, one of the primary providers of traditional medicine. *Healing by Hand* presents the first cross-cultural primer on manual medicine studies. As a particular modality of healing, manual medicine has reached a high level of popularity and importance as its practitioners investigate the body's important capacities for self-healing. The authors describe how manual medicine takes numerous forms across the world's communities in urban and rural as well as Western and non-Western contexts in individual and community lives. Though frequently overshadowed and challenged by allopathic practitioners, body workers continue to help the sick and injured reach their health goals. In this book, the individual ethnographic analyses of manual medicine describe beliefs and practices about healing physical and psychological states and the relation between culture and health. Given the therapeutic training of many of the authors, *Healing by Hand* should be a fascinating resource for manual practitioners of western medicine including massage therapists, physical therapists, chiropractors and osteopaths as well as those with traditional training. It is especially recommended for various courses such as Medical Anthropology, Health and Human Culture, Technology and the Developing World, Sociology of Health, International Health and Health Care Systems.
