*The History of Science and the History of the Scientific Disciplines* Horacio Capel Sáez, 1989

*Jinn from Hyperspace* Martin Gardner, 2009-09-25

Martin Gardner's status as a legend of popular mathematics and science writing was secured long ago. If you know him chiefly as a recreational mathematician, you'll find this collection of writings an eye opener. Gardner includes musings on homeopathy, false memory syndrome, G. K. Chesterton and Lewis Carroll among curiosities in physics and maths harvested from essays, articles and even letters to newspaper editors. Clear, closely argued and entertaining, they are a fascinating insight into the breadth of interest and fecundity of the man now in his 90s.

New Scientist

For over fifty years, Martin Gardner has been delighting readers with elegant, witty and highly intelligent writing on an amazing array of topics. Best known for his works on popular science and mathematics and as an incisive, skeptical commentator on the paranormal, Gardner is also an accomplished writer of children's literature, a novelist and a prolific essayist on religion, philosophy and other issues. This new collection of Gardner gems takes its name from an essay on a mathematical theme about a jinn or genie trapped in a Klein Bottle, an amusing tale that also teaches the math-phobic something interesting about a theoretical one-sided object with no distinction between inside and outside. Other topics in math and physics include speculations about universes where time runs in reverse, the Banach-Tarski paradox whereby a sphere after being deconstructed can be reassembled at twice its size, and a vigorous defense of the objective reality of mathematical theorems independent of human culture.

On the literary side, Gardner discusses two neglected works by G. K. Chesterton, one of which concerns an imaginary but now very topical war between Islam and Christianity. He also considers the fantasies of L. Frank Baum that don't take place in Oz, Clement Moore's ever popular *The Night Before Christmas*, and the many fascinating books by Lewis Carroll that are sometimes overshadowed by his famous *Alice in Wonderland*. A treat for longtime Gardner readers or the perfect introduction for newcomers, *The Jinn from Hyperspace* offers a rich selection of stimulating intellectual wonders.

Martin Gardner, the creator of *Scientific American's* Mathematical Games column, which he wrote for more than twenty-five years, is the author of almost one hundred books, including *The Annotated Ancient Mariner*, *Martin Gardner's Favorite Poetic Parodies*, *From the Wandering Jew to William F. Buckley Jr.* and *Science: Good, Bad and Bogus*. For many years, he was also a contributing editor to the *Skeptical Inquirer*.
