Annual Report Mpumalanga (South Africa). Department of Education, 2012      South Africa Survey ,2006      **Finweek**  
,2006-11      South African Schooling: The Enigma of Inequality Nic Spaull,Jonathan D. Jansen,2019-11-05 This volume brings together many of South Africa s leading scholars of education and covers the full range of South African schooling from financing and policy reform to in depth discussions of literacy numeracy teacher development and curriculum change The book moves beyond a historical analysis and provides an inside view of the questions South African scholars are now grappling with Are there different and preferential equilibria we have not yet thought of or explored and if so what are they In practical terms how does one get to a more equitable distribution of teachers resources and learning outcomes While decidedly local these questions resonate throughout the developing world South Africa today is the most unequal country in the world The richest 10% of South Africans lay claim to 65% of national income and 90% of national wealth This is the largest 90 10 gap in the world and one that is reflected in the schooling system Two decades after apartheid it is still the case that the life chances of most South African children are determined not by their ability or the result of hard work and determination but instead by the colour of their skin the province of their birth and the wealth of their parents Looking back on almost three decades of democracy in South Africa it is this stubbornness of inequality and its patterns of persistence that demands explanation justification and analysis This is a landmark book on basic education in South Africa an essential volume for those interested in learning outcomes and their inequality in South Africa The various chapters present conceptually and empirically sophisticated analyses of learning outcomes across divisions of race class and place The book brings together the wealth of decades of research output from top quality researchers to explore what has improved what has not and why Prof Lant Pritchett Harvard University There is much wisdom in this collection from many of the best education analysts in South Africa No surprise that they conclude that without a large and sustained expansion in well trained teachers early childhood education and adequate school resources South Africa will continue to sacrifice its people s future to maintaining the privileges of the few Prof Martin Carnoy Stanford University Altogether one can derive from this very valuable volume if not an exact blueprint for the future then certainly at least a crucial and evidence based itinerary for the next few steps Dr Luis Crouch RTI      *The Report: South Africa 2014* Oxford Business Group,2014-12-08 Indeed since the end of apartheid in 1994 South Africa has become a major diplomatic player both on the African continent as well as further afield Despite the size of South Africa s economy the country currently faces a number of major economic challenges As of the end of July 2014 the unemployment rate was at 25 5% according to data from Statistics South Africa which was among the highest in the world While the government s long term development plans are generally highly regarded delivery and execution has occasionally been problematic While there are major hurdles that must be cleared given the country s strong institutions and the rapid pace of economic expansion over the past two decades South Africa should be able to look

forward to 20 more years of peace and steady sustained economic growth      **Enterprise** ,2002-07      **Questions and Replies of the National Council of Provinces** South Africa. Parliament (1994- ). National Council of Provinces,2002

**Numbers & Needs** Allyson Lawless,2005      **Independent Schooling in Post-apartheid South Africa** Jacques Du Toit,2004 This paper presents a quantitative overview of the current South African independent schooling sector Historically research on the sector has been partial resulting in questions about its current size and profile A recent survey revealed that the sector has grown considerably since the nineties and that official sources underestimate its size Some popular myths about the sector being largely white and elitist are dispelled by the study which shows that historically disadvantaged learners currently constitute more than 70% of all learners and that more than 50% of all schools charge low to average fees However there is also evidence of new forms of inequity emerging and poor performance in parts of the independent sector of which roleplayers in the sector should be aware HSRC website      Taking Power in the Economy Susan Brown,Alta Fölscher,2004 Covers trends from the mid1990s to 2002
