Resources in Education ,2001-10 **Contemporary Research and Perspectives on Early Childhood Mathematics Education** Iliada Elia,Joanne Mulligan,Ann Anderson,Anna Baccaglini-Frank,Christiane Benz,2018-02-21 This book brings together a collection of research based papers on current issues in early childhood mathematics education that were presented in the Topic Study Group 1 TSG 1 at the 13th International Congress on Mathematical Education ICME 13 held at the University of Hamburg in 2016 It will help readers understand a range of key issues that early childhood mathematics educators encounter today Research on early childhood mathematics education has grown in recent years due in part to the well documented positive relation between children s early mathematical knowledge and their later mathematics learning and to the considerable emphasis many countries are now placing on preschool education The book addresses a number of central questions including What is mathematical structural development and how can we promote it in early childhood How can multimodality and embodiment contribute to early mathematics learning and to acquiring a better understanding of young children s mathematical development How can children s informal mathematics related experiences affect instruction and children s learning in different mathematics content areas What is the role of tools including technology and picture books in supporting early mathematics learning What are the challenges in early childhood mathematics education for teachers education and professional development **Third Symposium Proceedings. New Ways of Teaching and Learning** Janina Morska,Alan Rogerson, This volume contains the papers presented at the Third International Symposium on New Ways of Teaching Learning held from August 6 10 2024 at the Aemilia Hotel Bologna Italy The Conference was organized by The Mathematics Education for the Future Project an international educational project founded in 1986 and dedicated to innovation in mathematics statistics science and computer education world wide *ICT Education* Richard J. Barnett,Daniel B. le Roux,Douglas A. Parry,Bruce W. Watson,2022-12-07 This book constitutes the refereed proceedings of the 51st Annual Conference of the Southern African Computer Lecturers Association SACLA 2022 held in Cape Town South Africa during July 21 22 2022 The 10 full papers were included in this book were carefully reviewed and selected from 31 submissions They were organized in topical sections as follows curriculum assessment teaching in context innovative teaching and pandemic pedagogy **The African Book Publishing Record** ,1997 *The Moral Ecology of South Africa's Township Youth* S. Swartz,2009-11-23 This book provides an engaging account of the moral lives of young black South Africans once the struggle against apartheid ended and took away their object of political resistance It shows how partial parenting partial schooling and pervasive poverty contributes to how a group of young people construct right and wrong and what rules govern their behavior **Learning and Doing Policy Analysis in Education: Examining Diverse Approaches to Increasing Educational Access** Maria Teresa Tatto,Justin Bruner,Fida Hussain Chang,Corvell George Cramfield,Tara Miyoko Kintz,Nai-Cheng Kuo,Sandra Kurtti Pylvainen,Andleeb Sharif,2012-09-17 This book originated in a

policy analysis class at Michigan State University taught during 2010 Using Professor Tatto s unique approach to teaching policy analysis the professor and students agreed to construct a class that represented a reflective and grounded experience in the policy analysis of a current and relevant issue with global ramifications we began exploring policies that were developed at the global level and that were implemented locally We investigated the surge of globally developed standards and regulations in an effort to improve education Our goal was to learn cross nationally about policies that seek to reform curriculum and instruction under efficiency and global competitiveness arguments such as Education for All EFA and its USA cousin No Child Left Behind NCLB We knew our work would be bounded by the time available in a one semester class and by resource constraints We did exploratory inquiry supported by literature reviews reports on rigorous research studies and in one case an exploratory case study The policies we chose to explore such as EFA and NCLB offered us the opportunity to examine current reform tendencies that are intended to provide access to quality education for all children the preparation of teachers to support diverse populations the organization of schools to accommodate these children in response to vague policy mandates and power issues affecting the different constituencies and stakeholders The effects of these and other policies were difficult to track because research is scant and decisions are frequently made based on ideology or political persuasion Our purpose was to explore the critical issues that originated such policies and to search for documented evidence regarding policy implementation and effectiveness We investigated the factors that seemed to interfere with successful implementation from conceptual theoretical and methodological perspectives In this class we learned that there are not ready set frameworks for policy analysis but rather that these have to be constructed according to the issues that emerge as policies are conceptualized and implemented to fit local contexts and needs The book pays particular attention to the contexts of policy including the evolving conceptualization of global and local systems of governance knowledge regimes and policy spaces The book is designed for faculty and doctoral students in education who are interested in understanding diverse frameworks for policy analysis and for those in the general public who are interested in the policies we analyze here
