

Internal Structure of the Heart

The heart is a muscular organ that pumps blood throughout the body. It is composed of four chambers: the right and left atria and ventricles. The right atrium receives deoxygenated blood from the body, and the right ventricle pumps it to the lungs. The left atrium receives oxygenated blood from the lungs, and the left ventricle pumps it to the rest of the body. The heart is surrounded by a double-walled sac called the pericardium, which contains a fluid that lubricates the heart's movement.
