Consumers from every demographic and economic class are becoming more style-conscious, elevating the role of appearance in buying everything from cell phones to cars to clothing. While functionality and price are still critical factors, when faced with a choice between two similar products, consumers will always purchase the one with the most aesthetic appeal.

The power of appearance

If market success depends on reaching the right customer with the right product before the competition, it's essential to be able to evaluate and optimize product look and feel throughout the development process. Consumer tastes change daily, so having tools that can quickly and accurately incorporate design changes and accelerate reviews is a business requirement.

V5 DMU for Realistic Appearance Simulation lets you create high-quality, aesthetically appealing renderings to share with stakeholders, marketing, and customers.

Digital Mock-up (DMU) for Realistic Appearance Simulation provides early insight and collaborative review of product look and feel, performance and serviceability — key elements of any successful product introduction and of any Product Lifecycle Management (PLM) strategy. Within a unified PLM environment, Digital Mock-up (DMU) allows distributed product development teams to digitally create a product and its environment, in real-time, store it and analyze it to understand factors that will determine market appeal, quality, performance and cost.

Seeing what you mean

V5 DMU provides a comprehensive set of tools to simulate and iterate product appearance, all completely integrated with CATIA V5. This allows design teams to front-load more decisions in the virtual stage of development — before investing in expensive prototypes, production resources, and product launch activities. As important, it gives them the ability to quickly modify designs in real time to respond to changes in consumer buying trends.

V5 DMU for Realistic Appearance Simulation provides:

- A completely V5-integrated solution, including CATIA, DELMIA, and ENOVIA.
- Easy-to-use tools for materials, lights, environments definition.
