

Entity-Relationship Diagrams

Entity Relationship Diagrams in Enterprise Architect are based on Chen's ERD building blocks: Entities (tables) are represented as rectangles, Attributes (columns) are represented as ellipses (joined to their entity) and Relationships between the entities are represented as diamond-shape connectors.

ERD technology in Enterprise Architect assists you in every stage, from building conceptual data models to generating Data Definition Language (DDL) for the target DBMS.

Entity-Relationship Diagrams are available from the category 'Entity Relationship Diagrams'.
