

Simple Interest: is not interest on interest like compound but just the interest on the initial amount.

$$SI = \frac{PRT}{100}$$

SI = Simple Interest

P = Principal (what he started with)

R = Rate (not as a decimal or %)

T = Number of years

eg: Dan invested £2000 at 5% per year for 3 years at Simple Interest. How much did he have after 3 years?

so after 3 years:

$$SI = \frac{PRT}{100}$$

$$SI = \frac{2000 \times 5 \times 3}{100} = 300$$

Careful: this is only the interest
not the final amount like with CI

$$\text{Final Amount} = 2000 + 300 = \text{£}2\,300$$

Complex problem solving CPS and related topics such as dynamic decision making DDM and complex dynamic control CDC represent multifaceted psychological phenomena In abroad sense CPS encompasses learning decision making and acting in complex and dynamic situations Moreover solutions to problems that people face in such situations are often generated in teams or groups This adds another layer of complexity to the situation itself because of the emerging issues that arise from the social dynamics of group interactions This framing of CPS means that it is not a single construct that can be measured by using a particular type of CPS task e g minimal complex system tests which is a view taken by the psychometric community The proposed approach taken here is that because CPS is multifaceted multiple approaches need to be taken to fully capture and understand what it is and how the different cognitive processes associated with it complement each other Thus this Research Topic is aimed at showcasing the latest work in the fields of CPS as well as DDM and CDC that takes a holist approach to investigating and theorizing about these abilities The collection of articles encompasses conceptual approaches as well as experimental and correlational studies involving established or new tools to examine CPS DDM and CDC This work contributes to answering questions about what strategies and what general knowledge can be transferred from one type of complex and dynamic situation to another what learning conditions result in transferable knowledge and skills and how these features can be trained *Educational Leadership* ,1943 **The Numerical Solution of Elliptic Equations** Garrett Birkhoff,1971-01-01 A concise survey of the current state of knowledge in 1972 about solving elliptic boundary value eigenvalue problems with the help of a computer This volume provides a case study in scientific computing the art of utilizing physical intuition mathematical theorems and algorithms and modern computer technology to construct and explore realistic models of problems arising in the natural sciences and engineering **The Arithmetic Teacher** ,1992 **Logic and Boolean Algebra** Bradford Henry Arnold,2011-01-01 Orignally published Englewood Cliffs N J Prentice Hall 1962
