World Geography Today Holt Rinehart & Winston, 2000 *This Land* Christopher Ketcham, 2019-07-16 A big bold book about public lands The Desert Solitaire of our time Outside A hard hitting look at the battle now raging over the fate of the public lands in the American West and a plea for the protection of these last wild places The public lands of the western United States comprise some 450 million acres of grassland steppe land canyons forests and mountains It s an American commons and it is under assault as never before Journalist Christopher Ketcham has been documenting the confluence of commercial exploitation and governmental misconduct in this region for over a decade His revelatory book takes the reader

on a journey across these last wild places to see how capitalism is killing our great commons Ketcham begins in Utah revealing the environmental destruction caused by unregulated public lands livestock grazing and exposing rampant malfeasance in the federal land management agencies who have been compromised by the profit driven livestock and energy interests they are supposed to regulate He then turns to the broad effects of those corrupt politics on wildlife He tracks the Department of Interior's failure to implement and enforce the Endangered Species Act including its stark betrayal of protections for the grizzly bear and the sage grouse and investigates the destructive behavior of U S Wildlife Services in their shocking mass slaughter of animals that threaten the livestock industry Along the way Ketcham talks with ecologists biologists botanists former government employees whistleblowers grassroots environmentalists and other citizens who are fighting to protect the public domain for future generations This Land is a colorful muckraking journey part Edward Abbey part Upton Sinclair exposing the rot in American politics that is rapidly leading to the sell out of our national heritage The book ends with Ketcham's vision of ecological restoration for the American West freeing the trampled denuded ecosystems from the effects of grazing enforcing the laws already in place to defend biodiversity allowing the native species of the West to recover under a fully implemented Endangered Species Act and establishing vast stretches of public land where there will be no development at all not even for recreation *Resources in Education*, 1998 **Spatial Synthesis** Xinyue Ye, Hui Lin, 2020-11-30 This book describes how powerful computing technology emerging big and open data sources and theoretical perspectives on spatial synthesis have revolutionized the way in which we investigate social sciences and humanities It summarizes the principles and applications of human centered computing and spatial social science and humanities research thereby providing fundamental information that will help shape future research The book illustrates how big spatiotemporal socioeconomic data facilitate the modelling of individuals economic behavior in space and time and how the outcomes of such models can reveal information about economic trends across spatial scales It describes how spatial social science and humanities research has shifted from a data scarce to a data rich environment The chapters also describe how a powerful analytical framework for identifying space time research gaps and frontiers is fundamental to comparative study of spatiotemporal phenomena and how research topics have evolved from structure and function to dynamic and predictive As such this book provides an interesting read for researchers students and all those interested in computational and spatial social sciences and humanities **Developmental Psychiatry** Michael Rutter, 1987 This book provides a nontechnical account of human development that is particularly relevant to an understanding of psychiatric disorders In describing the process of physical mental emotional and behavioral development the contributors emphasize the aspects of development of greatest interest to clinicians and examine normal development in relation to its implications in clinical pathology

Managing Information in Complex Organizations Kevin C. Desouza, Tobin Hensgen, 2015-04-08 This seminal work presents an effective design for processing information through five stages from data to actionable knowledge in order to influence behavior within organizations The authors incorporate such concepts as evolution semiotics entropy complexity emergence crisis and chaos theory in an intriguing alternative to crisis management that can be applied to any organization Their model shows how to evaluate and share information to enable the organization to avoid disaster rather

than simply respond to it Additionally the text presents the first attempt at a multi disciplinary view of information processing in organizations by tying associated disciplines to their respective impacts on the information process Illustrations used in the text include an overlay that demonstrates how the non use of information between agencies contributed to the 9 11 disaster and an appendix addresses Organizing for Cyberterrorism **Drinking Water Microbiology** Gordon A.

McFeters,2013-03-07 The microbiology of drinking water remains an important worldwide concern despite modern progress in science and engineering Countries that are more technologically advanced have experienced a significant reduction in water borne morbidity within the last 100 years This reduction has been achieved through the application of effective technologies for the treatment disinfection and distribution of potable water However morbidity resulting from the ingestion of contaminated water persists globally and the available epidemiological evidence Waterborne Diseases in the United States G F Craun ed 1986 CRC Press demonstrates a dramatic increase in the number of waterborne outbreaks and individual cases within the United States since the mid 1960s In addition it should also be noted that the incidence of water borne outbreaks of unknown etiology and those caused by new pathogens such as *Campylobacter* sp is also increasing in the United States Although it might be debated whether these increases are real or an artifact resulting from more efficient reporting it is clear that waterborne morbidity cannot be ignored in the industrialized world More significantly it represents one of the most important causes of illness within developing countries Approximately one half the world's population experiences diseases that are the direct consequence of drinking polluted water Such illnesses are the primary cause of infant mortality in many Third World countries Once Within Borders Charles S. Maier,2016-10-17 At a time when the technologies of globalization are eroding barriers to communication transportation and trade Charles Maier explores the fitful evolution of territories politically bounded regions whose borders define the jurisdiction of laws and the movement of peoples as a worldwide practice of human societies
