Handbook of Environmental Economics Karl-Goran Maler, Jeffrey R. Vincent, 2005-12-09 Much applied environmental economics is concerned with the valuation of changes in environmental quality Obtaining reliable valuation estimates requires attention to theoretical and econometric issues that are often quite subtle Volume 2 of the Handbook of Environmental Economics presents both the theory and the practice of environmental valuation It synthesizes the vast literature that has accumulated since the publication of the Handbook of Natural Resource and Energy Economics two decades ago It includes chapters on individual valuation methods written by researchers responsible for fundamental advances in those methods It also includes cross cutting chapters that deal with aspects of welfare theory uncertainty experimental methods and public health that are pertinent to valuation Throughout the volume attention is paid to research and policy issues that arise not only in high income countries where most of the theory and econometrics that underlie applied valuation methods have been developed but also in poorer parts of the world The volume provides a state of the art reference for scholars and practitioners alike Handbook of Environmental Economics Karl-Göran Mäler, Jeffrey R.

Vincent, 2003 *The Handbook of Environmental Economics* focuses on the economics of environmental externalities and environmental public goods Volume I examines environmental degradation and policy responses from a microeconomic institutional standpoint Its perspective is dynamic including a consideration of the dynamics of natural systems and global with attention paid to issues in both rich and poor nations In addition to chapters on well established topics such as the theory and practice of pollution regulation it includes chapters on new areas of environmental economics research related to common property management regimes population and poverty mechanism design political economy of regulation experimental evaluations of policy instruments and technological change *The Ecological Rift* John Bellamy Foster, Brett Clark, Richard York, 2011-11-01 Humanity in the twenty first century is facing what might be described as its ultimate environmental catastrophe the destruction of the climate that has nurtured human civilization and with it the basis of life on earth as we know it All ecosystems on the planet are now in decline Enormous rifts have been driven through the delicate fabric of the biosphere The economy and the earth are headed for a fateful collision if we don't alter course In *The Ecological Rift Capitalism's War on the Earth* environmental sociologists John Bellamy Foster Brett Clark and Richard York offer a radical assessment of both the problem and the solution They argue that the source of our ecological crisis lies in the paradox of wealth in capitalist society which expands individual riches at the expense of public wealth including the wealth of nature In the process a huge ecological rift is driven between human beings and nature undermining the conditions of sustainable existence a rift in the metabolic relation between humanity and nature that is irreparable within capitalist society since integral to its very laws of motion Critically examining the sanguine arguments of mainstream economists and technologists Foster Clark and York insist instead that fundamental changes in social relations must occur if the ecological and social problems presently facing us are to be transcended Their analysis relies on the development of a deep dialectical naturalism concerned with issues of ecology and evolution and their interaction with the economy Importantly they offer reasons for revolutionary hope in moving beyond the regime of capital and toward a society of sustainable human development **Too Hot to Touch** William M. Alley, Rosemarie Alley, 2013 A fascinating and authoritative account of the controversies and possibilities surrounding nuclear waste disposal providing expert discussion in down to earth language **Books in Print Supplement**, 2002 *Bending the Arc Towards Justice* Rajni Shankar-Brown, 2021-09-01 School districts are experiencing increasing economic racial ethnic linguistic gender and sexuality cultural diversity across the United States and globally With increasing diversity and persistent social inequities widening National Center for Educational Statistics 2019 U S Census Data 2018 educational leaders face immense challenges and must actively work to build an equitable healthy school climate Educational leaders are critical for ensuring positive student outcomes and success but often report feeling inadequately prepared for current challenges Coalition for Teacher Equality 2016 Jordan 2012 Miller 2013 Mitani 2018 Papa 2007 Unfortunately growing challenges are contributing to high school administrator turnover rates and shortages Gates et al

Saving Our Environment from Washington David Schoenbrod, 2008-10-01 Congress empowered the Environmental Protection Agency on the theory that only a national agency that is insulated from accountability to voters could produce the scientifically grounded pollution rules needed to save a careless public from its own filth In this provocative book David Schoenbrod explains how his experience as an environmental advocate brought him to this startling realization letting EPA dictate to the nation is a mistake Through a series of gripping and illuminating anecdotes from his own career the author reveals the EPA to be an agency that under Democrats and Republicans alike delays good rules imposes bad ones and is so big muscle bound and remote that it does unnecessary damage to our society EPA stays in power he says because it enables elected legislators to evade responsibility by hiding behind appointed bureaucrats The best environmental rules those that have done the most good have come when Congress had to take responsibility or from states and localities rather than the EPA With the passion of an authentic environmentalist Schoenbrod makes a sensible plea for bottom up environmental protection now The responsibility for pollution control belongs not in agencies but in legislatures and usually not at the federal level but rather closer to home
