The Challenges of Public Procurement Reforms Annalisa Castelli,Gustavo Piga,Stéphane Saussier,Tünde Tátrai,2020-08-31 Public procurement affects a substantial share of world trade flows amounting to 1000 billion euros per year In the EU the public purchase of works goods and services has been estimated to account on average for 16 percent of GDP The novelty of this book is that it focuses on the new European Union Directives approved in 2014 by the EU Parliament The book consists of original contributions related to four specific themes of interest to the procurers day to day role in modern public purchasing organizations both economists and lawyers allowing for relevant exchanges of views and real time interaction The four sections which characterize the book are Life cycle Costing in Public Procurement Calculating Costs and Savings of Public Procurement Corruption and Probity in Public Procurement and Public Procurement and International Trade Agreements CETA TTIP and beyond These themes have been chosen for their current relevance in relation to the new European Public Procurement Directives and beyond The original format features as is the case with the first three volumes an introductory exchange between leading academics and practitioners from differing disciplines It offers a series of sequential interactions between economists lawyers and technical experts who supplement one another so as to enrich the liveliness of the debate and improve the mutual understanding between the various professions This essential guide will be of interest to policymakers academics students and researchers as well as practitioners working in the field of EU public procurement

Cyclones in Southern Africa Godwell Nhamo,Kaitano Dube,2021-07-24 The subject of tropical cyclones in Southern Africa also known as hurricanes or typhoons in other regions of the world has been growing over the past few

decades However there is still limited literature on foundational and fundamental topics on the matter To this end this book addresses this gap citing some examples from both historic and recent tropical cyclones The book presents meteorological and climatic aspects of tropical cyclones including reviews on forecasting warning message dissemination and public response aspects of early warning systems with a focus on the Tropical Cyclones Idai and Kenneth Fundamentals in disaster risk reduction DRR are also discussed moving from the provisions of the Hyogo Framework for Action 2005 2015 to the Sendai Framework for Disaster Risk Reduction 2015 2030 Climate change issues are central to the publication as well as the role of information and communication technologies in DRR and management The book also tackles some challenges and opportunities associated with the implementation of regional legal and institutional frameworks on DRR The book comes as part of a series with three volumes The other volumes include Cyclones in Southern Africa Vol 1 Interfacing the Catastrophic Impact of Cyclone Idai with SDGs in Zimbabwe and Cyclones in Southern Africa Vol 3 Implications for the Sustainable Development Goals To this end this book is suitable as a read for several professionals and disciplines such as tourism and hospitality studies economics sustainable development development studies environmental sciences arts geography life sciences politics planning and public health

Serpents in the Sand Courtney Brown, 2025-10-01 For decades social scientists have worked with models that have sought to quantify and explain human behavior The common foundation for nearly all of these mathematical applications is the assumption of linear progression equilibrium and stability *Serpents in the Sand* not only argues that political life is fundamentally nonlinear but thoroughly analyzes specific instances of extreme nonlinearity in politics By so doing Courtney Brown offers a guide to the reader on how to apply nonlinearity including chaos theory to real world situations The author develops his argument by in depth analysis of four examples covering a broad spectrum of political life He considers first the relationship between individual rationality and the influence of a voter s political milieu He then turns to look at the dynamics behind the Johnson vs Goldwater landslide presidential election of 1964 The fall of the Weimar Republic and the rise of Nazi Germany provide a third case study followed by an analysis of the relationship between democratic electoral politics and the ecological environment Highly original in its finding *Serpents in the Sand* resembles no other work on politics It is the first study of nonlinearity in political behavior to base its argument on specific examples rather than on analogies to physical and ecological systems Substantively the book draws provocative conclusions from the test cases examining for instance the potential for disaster in the oscillatory relationship between the way U S presidents are elected and the management of the country s environment In the end *Serpents in the Sand* extends its argument to the philosophy of human existence showing that human behavior is as nonlinear as all other processes in the universe Courtney Brown is Associate Professor of Political Science Emory University

Food Policy and the Environmental Credit Crunch Julie Hudson, Paul Donovan, 2013-09-11 The changing economic environment for the consumer that is emerging from the wreckage of the financial credit crunch plays directly into the importance of food

spending This is certainly true from the perspective of food prices in the short run but also from the perspective of sustainability and reducing the impact of the environmental credit crunch The economic changes we experience now have a bearing on our ability to manage the environmental credit crunch that looms Food Policy and the Environmental Credit Crunch From Soup to Nuts elaborates on the issues addressed in the authors first book From Red to Green and asks whether the financial credit crunch could ameliorate or exacerbate the emergent environmental credit crunch The conclusion drawn here is that a significant and positive difference could be made by changing some of the ways in which we procure prepare and consume our food Written by an economist and an investment professional this book addresses the economic and environmental implications of how we treat food The book examines each aspect of the food chain from agriculture to production and processing retail preparation consumption and waste

Environmental Hazards and Resilience Dennis J. Parker, Edmund C. Penning-Rowsell, 2021-08-26 Building resilience to the world s increasingly damaging environmental hazards has become a priority This book considers the scientific advances which have been made around the world to enhance this resilience Although resilience is not new it is through the idea of resilience that governments organisations and communities around the world are now seeking to address the rapidly increasing losses that environmental hazards cause so that fewer lives are lost and damage is reduced Alternative ideas and approaches have been helpful in reducing loss but resilience offers a fresh and potentially effective means of reducing it further Adopting a scientific approach and scientific evidence is important in applying the resilience idea in hazard mitigation However the science of resilience is at an immature stage of development with much discussion about the concept and how it should be understood and interpreted Building useful theories remains a challenge although some of the building blocks of theory have been developed More attention has been given to developing indicators and frameworks of resilience which are subsequently applied to measure resilience to hazards such as flooding earthquake and climate change *Environmental Hazards and Resilience Theory and Evidence* considers the scientific and theoretical challenges of making progress in applying resilience to environmental hazard mitigation and provides examples from around the world including the USA New Zealand China Bangladesh and elsewhere The chapters in this book were originally published in the *Environmental Hazards*

A Strategic Nature Melissa Aronczyk, Maria I. Espinoza, 2022 A look at how public relations has dominated public understanding of the natural environment for over one hundred years In *A Strategic Nature* Melissa Aronczyk and Maria I Espinoza examine public relations as a social and political force that shapes both our understanding of the environmental crises we now face and our responses to them Drawing on in depth interviews ethnography and archival research Aronczyk and Espinoza document the evolution of PR techniques to control public perception of the environment since the beginning of the twentieth century More than spin or misinformation PR affects how institutions and individuals conceptualize environmental problems from conservation to coal mining to carbon credits Revealing the linkages of professional strategists information politics and

environmental standards A Strategic Nature shows how public relations restricts alternative paths to a sustainable climate future

The Cambridge Handbook of Political Psychology Danny Osborne,Chris G. Sibley,2022-02-24 The Cambridge Handbook of Political Psychology provides a comprehensive review of the psychology of political behaviour from an international perspective Its coverage spans from foundational approaches to political psychology including the evolutionary personality and developmental roots of political attitudes to contemporary challenges to governance including populism hate speech conspiracy beliefs inequality climate change and cyberterrorism Each chapter features cutting edge research from internationally renowned scholars who offer their unique insights into how people think feel and act in different political contexts By taking a distinctively international approach this handbook highlights the nuances of political behaviour across cultures and geographical regions as well as the truisms of political psychology that transcend context Academics graduate students and practitioners alike as well as those generally interested in politics and human behaviour will benefit from this definitive overview of how people shape and are shaped by their political environment in a rapidly changing twenty first century

Repairing the Climate L.J. Reinders,2024-11-01 Climate change is triggered by a too high concentration of greenhouse gases in the air carbon dioxide in particular primarily originating from fossil fuel burning Since such burning will not stop any time soon the concentration will undoubtedly rise further exacerbating climate change There is no escape from this That is where carbon capture comes in direct air capture DAC scrubs the surplus carbon dioxide out of the air for actually lowering this concentration At the same time emission levels must be drastically lowered by fitting point source emitters with carbon capture installations This book sets out the case for such carbon capture which is a must without which the climate cannot be repaired

Dealing with Disaster Saundra K. Schneider,2011-08-30 Why does government sometimes do a superlative job handling natural disaster situations while at other times as in the case of Hurricane Katrina it performs extremely poorly Updated with examples through 2010 this classic study examines the disruptive effects of disasters on patterns of human behavior and the routine operations of government and the conditions under which even relatively minor crises can lead to system breakdown Integrating case studies of emergency management with studies of collective behavior the author identifies factors that contribute to successful government handling of disaster situations and distills insights that can be used to improve these capacities at all levels federal state and local The book includes numerous illustrations as well as expanded coverage of research on disaster management and greatly expanded reference lists
