**Problem 4B****NEWTON'S SECOND LAW****PROBLEM**

A 1.5 kg ball has an acceleration of  $9.0 \text{ m/s}^2$  to the left. What is the net force acting on the ball?

**SOLUTION**

Given:  $m = 1.5 \text{ kg}$   
 $a = 9.0 \text{ m/s}^2$  to the left.

Unknown:  $F = ?$

Use Newton's second law, and solve for  $F$ .

$$F = ma$$

Because there is only one force,

$$F = F$$

$$F = (1.5 \text{ kg})(9.0 \text{ m/s}^2) = 14 \text{ N}$$

$$F = \boxed{14 \text{ N to the left}}$$

**ADDITIONAL PRACTICE**

- David Parley, a racing driver, survived deceleration from  $173 \text{ km/h}$  to  $0 \text{ km/h}$  over a distance of  $0.560 \text{ m}$  when his car crashed. Assume that Parley's mass is  $78.0 \text{ kg}$ . What is the average force acting on him during the crash? Compare this force to Parley's weight. (Hint: Calculate the average acceleration first.)
- A giant crane in Washington, D.C., was tested by lifting a  $2.000 \times 10^6 \text{ kg}$  load.
  - Find the magnitude of the force needed to lift the load with a net acceleration of  $0 \text{ m/s}^2$ .
  - If the same force is applied to pull the load up a smooth slope that makes a  $30.0^\circ$  angle with the horizontal, what would be the acceleration?
- When the click beetle jumps in the air, its acceleration upward can be as large as  $400.0$  times the acceleration due to gravity. (An acceleration this large would instantly kill any human being.) For a beetle whose mass is  $40.00 \text{ mg}$ , calculate the magnitude of the force exerted by the beetle on the ground at the beginning of the jump with gravity taken into account. Calculate the magnitude of the force with gravity neglected. Use  $9.807 \text{ m/s}^2$  as the value for free-fall acceleration.

**Physics and Philosophy: Volume 4** Paul K. Feyerabend, 2015-09-17 This collection of the writings of Paul Feyerabend is focused on his philosophy of quantum physics the hotbed of the key issues of his most debated ideas Written between 1948 and 1970 these writings come from his first and most productive period These early works are important for two main reasons First they document Feyerabend's deep concern with the philosophical implications of quantum physics and its interpretations These ideas were paid less attention in the following two decades Second the writings provide the crucial background for Feyerabend's critiques of Karl Popper and Thomas Kuhn Although rarely considered by scholars Feyerabend's early work culminated in the first version of *Against Method* These writings guided him on all the key issues of his most well known and debated theses such as the incommensurability thesis the principles of proliferation and tenacity and his particular version of relativism and more specifically on quantum mechanics

**Keeper of the Nuclear Conscience** Andrew Brown, 2012-02-09 As Andrew Brown shows in *Keeper of the Nuclear Conscience* Joseph Rotblat's life from an impoverished childhood in war torn Warsaw to an active old age that brought honors and public recognition including the Nobel Peace Prize is a compelling human story in itself What gives it added significance is Rotblat's single minded dedication to peaceful causes particularly his pursuit of nuclear disarmament Here is the first full biography of Joseph Rotblat based on complete access to his private papers Brown describes how Rotblat overcame poverty and anti-Semitism to become a nuclear physicist becoming a key member of the British team that worked on the atomic bomb in England and with the Manhattan Project in America But Rotblat appalled by the use of atomic bombs against the Japanese and deeply depressed by the brutal death of his wife in the Holocaust soon became one of the prime architects of the anti nuclear movement The book describes his post war activities under the shadow of Britain's nuclear program his first political and media encounters his exposure of the hazards of radioactive fallout and his friendship with Bertrand Russell Brown shows that Pugwash the anti nuclear group that Rotblat helped form eventually established an invaluable back channel link that penetrated the Iron Curtain Indeed it was a Pugwash office that facilitated the first meeting between Gorbachev and Reagan Gorbachev's security advisers were heavily influenced by Pugwash ideas especially the concept of non offensive defense in Europe Rotblat dedicated the last six decades of his life to peaceful causes and to efforts to uphold the ethical application of science In this engaging biography we discover a great man whose profound conscience shaped his life and work and left an important legacy for future generations

Whitelaw, 2012-12-06 The Fourth International Symposium on Turbulent Shear Flows took place at Karlsruhe University in Germany The papers presented at this Symposium encompassed a similar range to that of the previous meetings with greater emphasis placed on experimental work and continued a trend towards the examination of complex flows Once again three dimensional recirculating and reacting flows featured strongly in the programme and were complemented by consideration of two phase flows and discussions of both numerical and experimental techniques The Symposium brought together some 300 participants from all over the world and it was evident that there is a need for Turbulent Shear Flows Symposia in order to obtain and communicate new information useful to researchers in the field of turbulent flows and of interest to engineers who design flow equipment This volume contains 27 papers selected from more than 100 presentations at the Symposium which have been reviewed and edited before publication Together they provide an indication of the status of current knowledge on the subjects represented at the Symposium They are grouped into four sections namely Fundamentals Free Flows Boundary Layers Reacting Flows As in previous volumes in this series each section begins with an introductory article considering the papers which follow in the broader context of available literature and current research      The American Catalogue ,1905      **Sessional Papers** Great Britain.
