CONCLUSION

Pant Perfection

Since Adam and Eve first partook of that forbidden fruit, humans have spent immense resources to develop the perfect accoutrement for all seasons and occasions. While trends continue to evolve with various cultural and economic shifts, pants (also known as slacks) remain the most steadfast form of clothing, holding greater utility and value than all other forms of bottoms.

Pants are more sustainable than other bottoms, in terms of both manufacturing and daily usage. Ostensibly, the best clothes are the clothes a person chooses to wear frequently, without thought or second guess. In the annual Pants Symposium of 2022, Dr. Jeremy Trousers of Slack University notably said, "Pants have a psychology behind them. Pants can be worn at any time of year and are thus more likely to be worn than to stay stuck in a pile in the closet or at the bottom of a landfill."

Many people state that pants are naturally built for discomfort. However, this argument is specious at best. A survey of the student campus found that pants were not more or less comfortable than any other item of clothing. This suggests that pants are not as uncomfortable as often stated by the larger population, while also bringing to light the naturally subjective concept of "discomfort."

Pants are the best bottom covering and one of the best forms of clothing among all basic metrics. Questions about labor practices and materials used in manufacturing are worth addressing, but these apply to larger clothing industry standards. Further consideration of the clothing industry's impact on ecology and human labor is worthy and may prove to only support pants supremacy.

- Build a thesis that actually states an arguable opinion.

- Use outside sources as evidence to support argument points.
- Address potential counterarguments (if space allows).

How To Develop An Argument For A Research Paper

How To Develop An Argument For A Research Paper:

The International Student's Guide to Writing a Research Paper Janine Carlock,Maeve Eberhardt,Jaime Horst,Peter Kolenich,2017-06-13 The International Student s Guide to Writing a Research Paper is a reference text for undergraduate students and those in ESL or bridge courses who are writing a research paper for the first time This book is partly an update of Writing a Research Paper by Lionel Menasche 1998 and partly a companion to The ESL Writer s Handbook Each section of the book includes a discrete task called a Building Block which requires students to apply the skills learned toward the development of their own paper This step by step approach allows students to construct knowledge as they become more familiar with the process making writing a research paper a less intimidating task Special features This guide uses simple direct language for those for whom writing a research paper is new Most example writing is from international students in an ESL program or first year writing class including two sample papers one in APA and one in MLA A section on responding to instructor feedback to provide students with the tools to read and understand comments and use them to improve the first draft A subsection dedicated to constructing clear and cohesive paragraphs and sentences The guide includes citation and style examples in MLA 8th edition *How to Write a BA Thesis, Second Edition* Charles Lipson,2018-12-05 How to Write a BA Thesis is the only book that directly addresses the needs of undergraduate students writing a major paper This book offers step by step advice on how to move from early ideas to finished paper It covers choosing a topic selecting an advisor writing a proposal conducting research developing an argument writing and editing the thesis and making through a defense Lipson also acknowledges the challenges that arise when tackling such a project and he offers advice for breaking through writer s block and juggling school life demands This is a must read for anyone writing a BA thesis or for anyone who advises these students *A Guide to Argumentative Research Writing and Thinking* Arnold Wentzel,2017-11-09 Research is difficult Even though students are trained in the basic research methodology skills when confronted with research writing it feels to them as if they enter a bizarre world with its own language and conventions where it is hard to get things right This book translates the apparent complexities of research writing into everyday ideas language and skills and will enable novice researchers to start overcoming the major stumbling blocks immediately This book focuses only on the greatest challenges in research writing specifically those that supervisors find most difficult to explain to novice researchers These challenges include both basic and more complex skills such as finding original research contributions establishing one s voice while drawing on other authors turning a vague idea into a feasible research question generating literature reviews that are original in themselves and avoiding list like writing when discussing the research methodology Wentzel shows that it is easier to overcome these challenges not with lists of prescriptions that are difficult to remember while writing but rather by cultivating an argumentative mindset Not only is such a mindset much easier to maintain but it offers a central point around which one can organise any difficult writing task The book shows how to use the argumentative mindset to approach every

important writing challenge It translates all the necessary skills into jargon free language using a variety of visuals and simple step by step procedures that will enable any person to read the book quickly and start writing immediately The book is accompanied by a website containing an instructor s manual with guidance on the teaching and assessment of research writing as well as lecture slides Writing an A+ Research Paper: A Roadmap for Beginning and Experienced Writers ,2008
