Reverse Parallel Park

1 Find a suitable space. This should be a space that you can get your car into without damaging anyone else's vehicle. Ideally the space should be a few meters longer than your car.

2 Pull up as close to car 'A' as possible and straighten up so the 2 cars are parallel to each other. Even if the cars are a different length, line up the back of your car with the back of car 'A'.

4 Turn around and look out of the back of the car and start reversing very slowly towards car 'B'. Do not move your wheel from it's fully turned position.

3 Now stop and turn your steering wheel all the way to the left. Don't move whilst you are doing this.

5 Stop reversing when the front right corner of car 'B' is exactly in the middle of your rear windscreen.

6 Whilst stopped, turn your wheel back to the middle position.

7 Continue reversing until your car has literally just passed car 'A'.

8 Stop and turn your wheel fully to the right. Don't move the car whilst you're doing this.

9 Continue reversing slowly towards car 'B' do not move your wheel from it's fully turned position.

10 Once your car is parallel, stop and turn your wheel back to the centre position.
