### Types of Maps

**Topographic maps** = show contour lines of elevation

- Reference maps** = show general information about places and their boundaries
- Thematic maps** = show density and distribution of quantitative data

**choropleth maps** = use colors and shading to represent quantitative data

excellent at showing density and its distribution

**dot distribution maps** = uses dots with specific values or approximate locations used to show distribution (cluster/spread?)

**graduated symbol maps** = uses symbols of different sizes to represent values

used to show quantitative data and differences between areas

**isoline maps** = uses lines to connect points of equal value to depict variations in data

help recognize patterns of relationships between area's geography and data

**cartograms** = sizes of areas are proportional to data being measured used to display the emphasis of how present a feature is

**flow line maps** = express directions of geographic movement

display migration patterns well
