Power, Legal Education, and Law School Cultures Meera Deo, Mindie Lazarus-Black, Elizabeth Mertz, 2019-10-10 There is a myth that lingers around legal education in many democracies That myth would have us believe that law students are admitted and then succeed based on raw merit and that law schools are neutral settings in which professors also selected and promoted based on merit use their expertise to train those students to become lawyers Based on original empirical research this book investigates this myth from myriad perspectives diverse settings and in different nations revealing that hierarchies of power and cultural norms shape and maintain inequities in legal education Embedded within law school cultures are assumptions that also stymie efforts at reform The book examines

hidden pedagogical messages showing how presumptions about theory's relation to practice are refracted through the obfuscating lens of curricula. The contributors also tackle questions of class and market as they affect law training. Finally, this collection examines how structural barriers replicate injustice even within institutions representing themselves as democratic and open, revealing common dynamics across cultural and institutional forms. The chapters speak to similar issues and to one another about the influence of context, images of law and lawyers, the political economy of legal education and the agency of students and faculty.

Open Labs and Innovation Management Valérie Mérindol, David W. Versailles, 2022-11-25. This book examines returns on experience and managerial practices to generate deeper collaboration, intensify co-creation, support start-ups and established companies to explore, develop and accelerate their projects thanks to open labs, living labs, fab labs, coworking spaces, third spaces etc. Open labs are the beatbox to create a rhythm in ecosystems and make all stakeholders move forward faster together. This book proposes a framework to understand how open labs, innovation hubs and collaborative spaces contribute to ecosystems. The book looks beyond the short-term effects of open labs and identifies four main dimensions: communities, physical spaces, events and portfolios of services offered to private businesses, entrepreneurs and start-ups, established companies or public institutions. Drawing on extensive field research lasting over five years with more than 40 cases and more than 200 interviews plus direct observation within different environments, this edited book investigates how managers run these labs and how users or clients evolve when benefitting from their services. All chapters analyse how an actual management impacts the dynamics of communities, how it shapes the co-evolution between open labs and their ecosystems and how the management of the physical space impacts the mission of the lab and its role in the ecosystem. *Open Labs and Innovation Research* is written for scholars and researchers in the fields of innovation studies and management science.
